

WEICON VA 200 HR

Cyanoacrylate adhesive for special requirements, moistureresistant, low viscosity

WEICON Contact VA 200 HR is a transparent cyanoacrylate adhesive with low viscosity. It shows high ageing resistance and consistently high strength, even under prolonged influence of moisture and warmth. After several days under constant influence of moisture and warmth, the cyanoacrylate adhesive shows the same high performance.

Due to this high moisture resistance, VA 200 HR is suitable especially for applications exposed to varying weather conditions. The cyanoacrylate adhesive can be used in pipe and pipeline construction, for example, in the construction of kitchen and electronic devices, in tank and apparatus construction, in ventilation and air-conditioning technology, in gardening and landscaping as well as in sanitary facilities.

It is suitable for various applications, such as the attachment of a control unit in a dish washer, for the production of sealings for concrete pipes, for mounting accessories in rooms with increased air humidity such as kitchens or bathrooms, for mounting components for outdoor sports such as rubber profiles to a snowboard, or for attaching armrests to outdoor furniture.

Technical Data

Ester type	ethyl
Composition	opaque
Viscosity at +20°C (+68°F) according to Brookfield	120-200 mPa·s
Max. Gap Bridging	0,15 mm
Initial strength on aluminium	60 - 90 sec.
Initial strength on NBR-Rubber	5 - 20 sec.
Initial strength on hard PVC	90 - 150 sec.
Final strength approx. after	24 h
Shear strength according to DIN EN 1465 at:	
Steel sand blasted	20 N/mm²
Sand-blasted Aluminium	15 N/mm²

Rigid PVC	13 N/mm²	
ABS	13 N/mm²	
PC	10 N/mm²	
NBR	> 8 N/mm²	
Temperature resistance	-50 to + 80 (-58 °F to + 176 °F) / softening temp. +150 (302 °F) °C	

Surface pre-treatment

For a flawless adhesive bond, surfaces must be clean and dry (clean and degrease with WEICON Surface Cleaner). Smooth surfaces should be roughened mechanically. To improve the adhesion of plastics difficult to bond (e.g. PE, PP, POM, PTFE), thermoplastic elastomers (TPE) and silicones, WEICON CA-Primer can be applied to the bonding surface.

Processing

- Apply WEICON Contact Cyanoacrylate Adhesive to just one of the bonding surfaces.
- The layer thickness when applying the adhesive should be between min. 0.05 and max. 0.2 mm (depending on the type), as otherwise complete curing cannot be guaranteed.
- For large-surface bondings, WEICON Contact Cyanoacrylate Adhesives should be applied in dots in order to prevent inner tensions.
- WEICON Contact Cyanoacrylate Adhesives are very economical. One drop covers approx. 3 to 5 cm² bonding surface.
- The components should be bonded at a relative air humdity level between 40 % and 80 %. Below 40 %, the curing process is slowed down significantly or even prevented altogether. At an air humdity level above 80 % or with strongly basic substrates (e.g. glasses), the risk of shock-curing occurs. In these cases, certain materials show a drop in strength by 10 % to 15 % due to tensions in the adhesive layer.
- Alkaline surfaces (pH value >7) accelerate the curing process, acidic surfaces (pH value <7) slow down the curing process and can prevent polymerisation altogether in extreme cases.

Storage

WEICON Contact Cyanocrylate Adhesives have a shelf life of at least 9 months, when stored in unopened condition at room temperature (+18 °C to +25 °C) in a dry and dark space. Temperatures of approx. +5 °C will increase the shelf life to 12

Safety and health

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

Available sizes:

12755030 WEICON VA 200 HR 30 g 12755060 WEICON VA 200 HR 60 g

Accessories:

12500150 CA-Activator Spray, 150 ml 12505150 CA-Activator Spray AC, 150 ml 12955170 Dosing Tips, Size 0

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.
