

Crafted to Withstand the Test of Time

With innovative engineering & high-grade materials, our saunas are built for longevity.

Concept sketch

Lighter. Stronger.

With advancements in manufacturing and smarter design processes, Clearlight® saunas are built to last while using less materials.

From the wood press in our factory, through the final stages of packaging, Clearlight® Infrared Saunas are beautifully crafted and built to last.

By using the highest-grade materials, and adhering to the highest standards of design, manufacturing and assembly, Clearlight® ensures your sauna will be sturdy and reliable while using less material.

Applied Engineering

- ✓ Material measurements
- ✓ 3-D structural analysis
- ✓ Computer modeling to test loads and forces

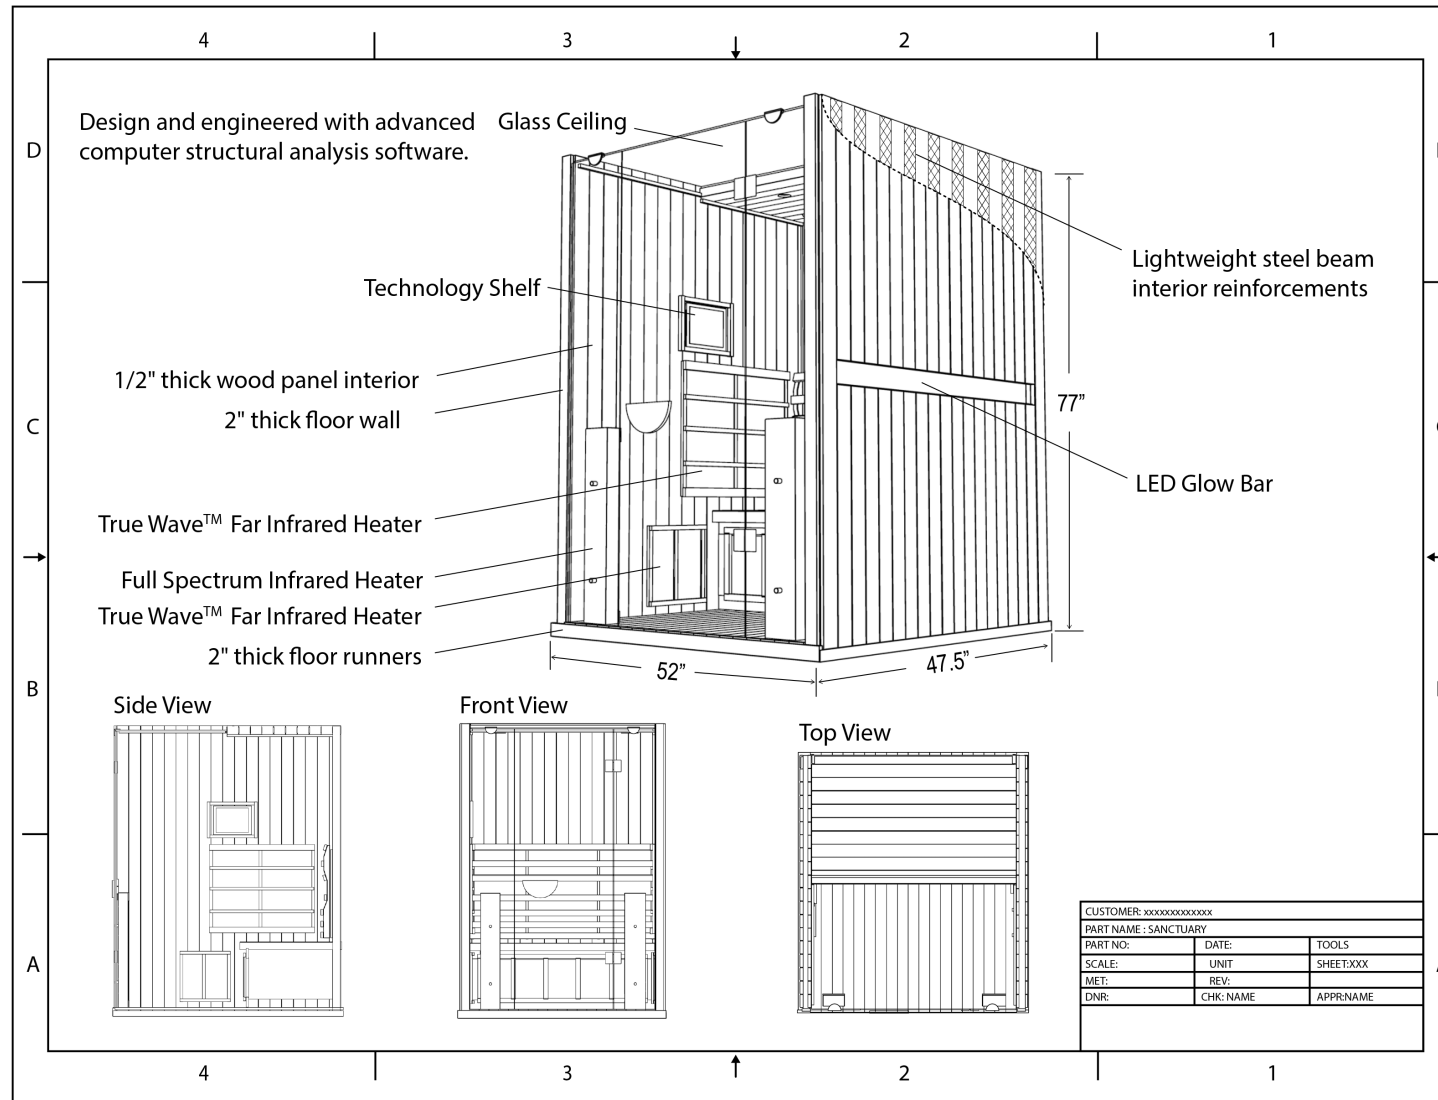

Quality Construction

- ✓ Material selection
- ✓ Refined craftsmanship
- ✓ 4-stage quality control

Practical Benefits

- ✓ Less environmental impact
- ✓ Cabins that are easier to lift and install
- ✓ Safer structure

Crafted to Withstand the Test of Time
