Instruction manual Devside Trading

1. After purchase

Upon purchasing a Devside Trading product you will receive your order confirmation via email. The email contains your license key which you will need to activate your product. You can find the license key in the top right corner of the email.

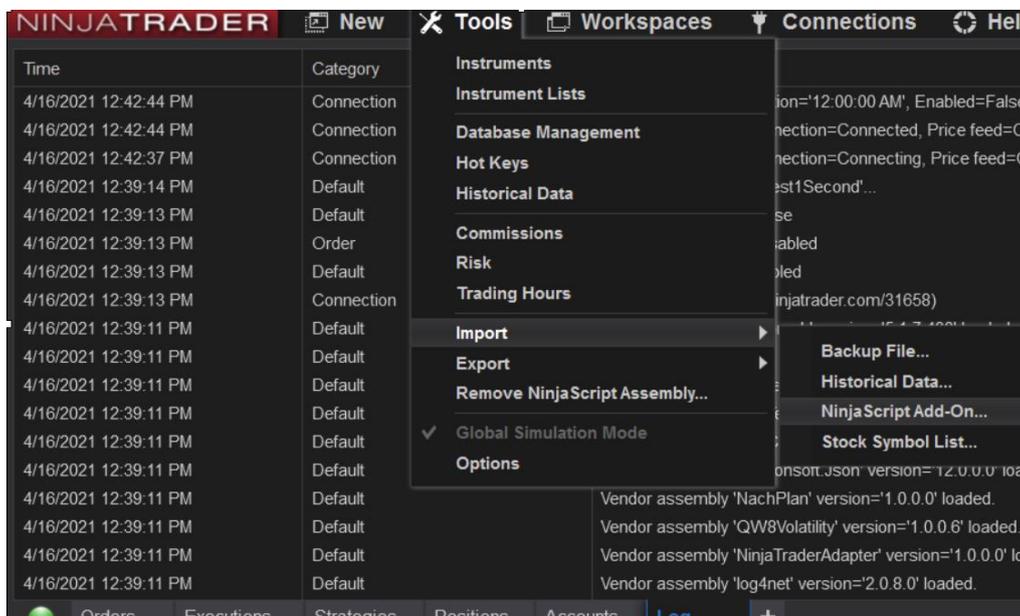

You will also receive your software as a .zip-file directly after the purchase on the website and in a separate email.

2. Installation

To install and use Devside Trading Product with NinjaTrader 8, please follow these steps:

1. You will receive the add-on in form of a .zip file.
2. In NinjaTrader 8, select **Tools** → **Import** → **NinjaScript Add-On**.

3. From your file explorer, choose the .zip file that you downloaded and open it. A pop-up will confirm the successful installation.
4. After the installation, please restart NinjaTrader.

3. Activation

To activate your product, you will need your license key you received per email after purchase.

1. In the **Control Center** please select **New** → **Devside Trading**. This will initiate the software activation process.
2. In the software activation window, please follow the instructions and enter your License Key which you have received via email and click **submit** to activate your software.

Devside Trading Software Activation

DEVSIDE

Thank you for choosing Devside Trading software.

The software activation requires you to provide your License Key. You will receive your License Key from Devside GmbH via mail. Please make sure to enter the correct number, as the software will be tied to this device.

Devside Trading

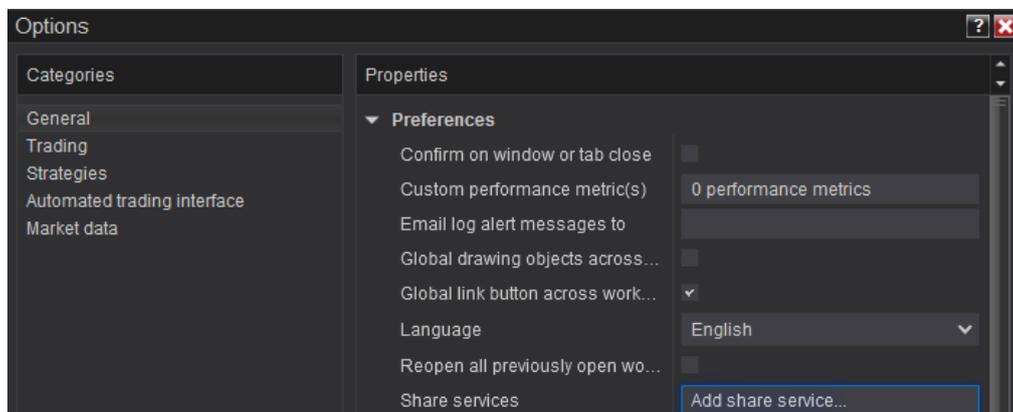

4. Share Service

To use a Share Service, it needs to be configured first. Please follow these steps to configure your Share Service:

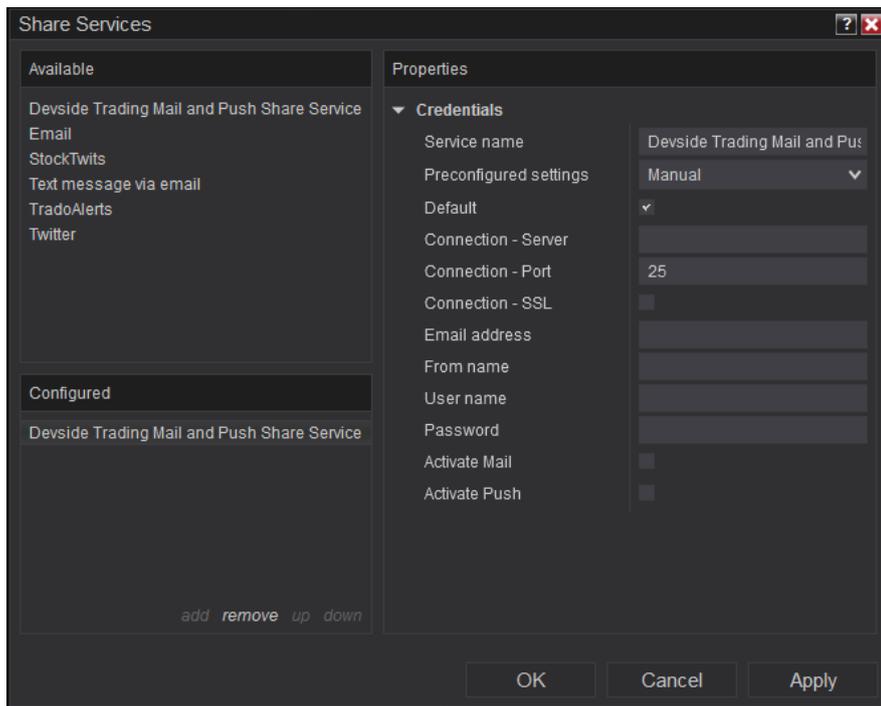

1. In the **Control Center** select **Tools** → **Options**

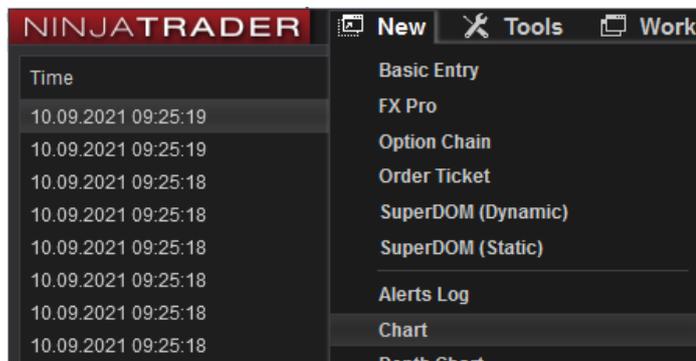

2. In the new **Options** window on the left side under **Categories** select **General** and on the right side under properties click **add share service**

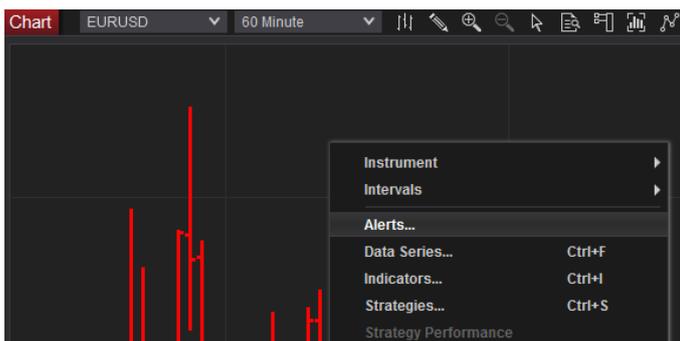

3. Select your Devside Trading Share Service from **Available** and add it to **Configured** by clicking **add**.

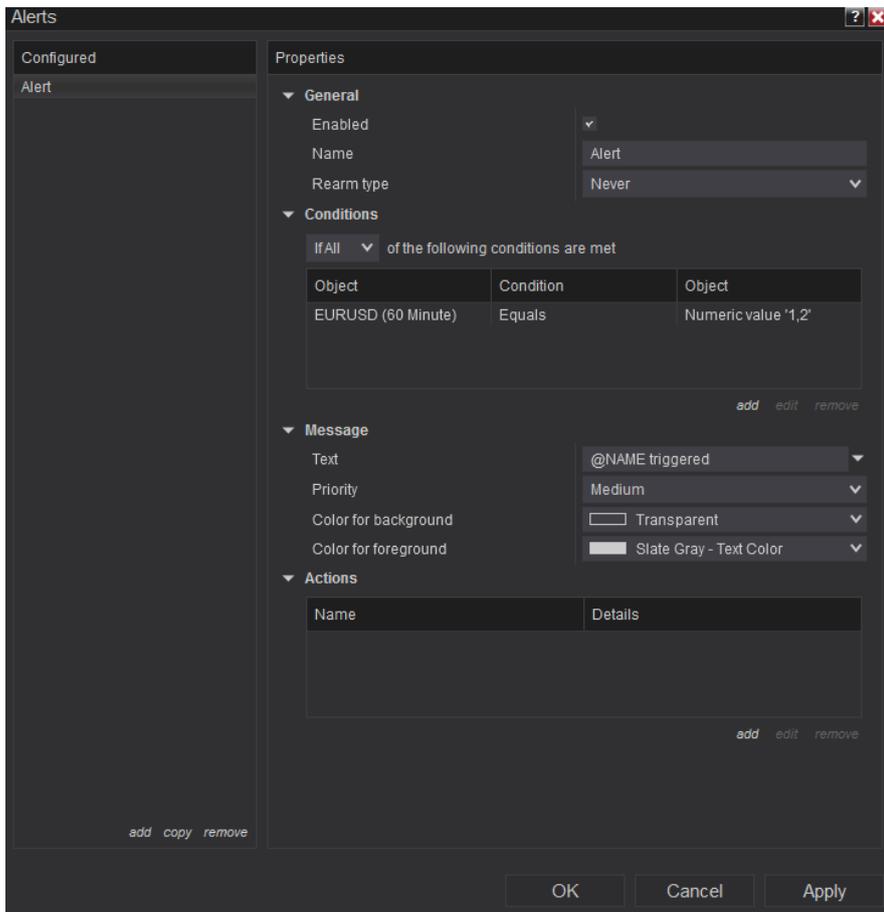

4. Depending on the share service you purchased you may need to configure your email settings.
5. Confirm the settings by clicking okay.
6. Now you can use your share service from a chart. To do so create a new Chart from **Control Center** → **New** → **Chart**.

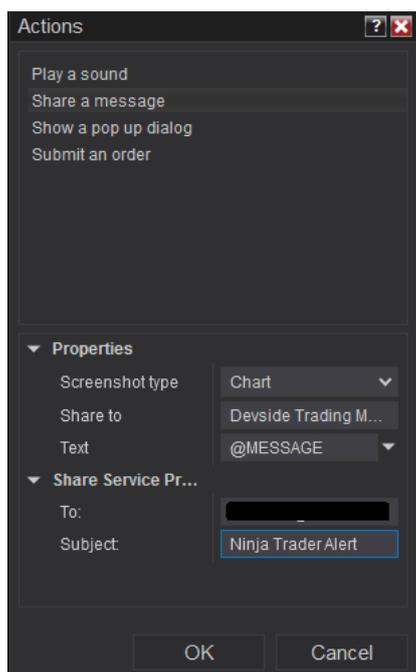

7. Configure your chart and confirm with **okay**.
8. Right click the chart window and select alerts.

9. Configure the alert in the new **Alerts** window. Don't forget to enable the alert and create conditions for it.

10. Under **Actions** click **add**. In the new **Actions** window select **share message**. Under **Properties** select your share service for **Share to**. If your share service supports email you will need to enter the recipient email address under **to** and the subject for the email under **subject**.

11. Now the share service is set up and will send messages as soon as the conditions are met.
12. If your share service supports push messages, to receive the messages with our Trado Alerts app, please install it from [Apple App Store](#) or [Google Play Store](#).
13. Scan the **QR Code** with the Trado Alerts app from the Activation window under **Control Center** → **New** → **Devside Trading**.
