

KNOW MORE ABOUT BEARD ROLLER ACTIVATOR KIT

Few simple steps for all your worries:

1. Clean wash your face with a gentle cleanser/face wash and pat dry with a towel.
2. Place the beard roller on facial area where you want growth and gently roll it across. Let the micro-needles penetrate your skin but don't push the needles too hard (you need not draw blood to get results).
3. Apply RUBAB MEN Beard Growth Oil after derma rolling to moisturize your skin and lead to healthy follicular growth. Just a small dab of RUBAB MEN Beard oil every day after shower and before going to bed can be worked into your beard area to soothe your skin and help with stimulating beard growth. Massage it well for better absorption.

NOTE :

Use The Beard Roller twice a week

Clean The Beard Roller by dipping it into a glass of hot water for 5 minutes before use.

Roll with a light pressure 5-10 times back and forth - horizontally, vertically and diagonally. *When rolling, lift the roller instead of just twisting it to a new direction. Twisting will damage your skin and may lead to an infection.*

After completing the needling process, your skin will look red due to the increase in blood flow to that specific area. Give time for your skin to settle & things should return to normal in 5-10 minutes.

During the micro needling process, if you feel pain or discomfort, stop it immediately.

There is no need to use The Beard Roller more than twice a week. The skin needs time between use to regenerate. Don't use The Beard Roller on irritated or infected skin. It should never be painful to use.

Wash The Beard Roller with water after use.

The Beard Roller is personal and should never be shared. The lifetime of The Beard Roller is not infinite (around 6 months). When the needles are no longer sharp enough to penetrate the skin easily, it's time for a replacement.

Suggested to use at night as any redness on the skin will get away till morning.

Use a derma roller only once or twice a week with a gap of 3 days. Additional use of it won't help growing facial hair but instead could damage your skin as micro needling needs time to heal and repair. Apply beard oil every day after shower and before going to bed.

SUMMARY

- 1) Use Beard Roller (suggested at night) twice a week followed by Beard Oil.
- 2) Use Beard Oil twice daily after shower and before bed.

RESULTS:

Most men start seeing new small white hairs growing after 4-8 weeks when using The Beard Growth Kit consistently. The important thing is that you don't expect to grow a full beard overnight. It will take time to grow a fuller beard.

A beard journey differs from person to person. Everybody has their own starting point and goal. We recommend a beard journey of 90 -150 days to get a realistic indication of your growth potential.

DID YOU KNOW?

The best, premium and safest beard rollers are commonly made of titanium unlike other cheap steel and plastic needles. RUBAB MEN Beard Growth Roller is made up of those 540 titanium needles!

Other benefits of beard roller aka derma roller are to diminish fine lines, acne scars and hyperpigmentation.
