

FRAME BUILD OPTIONS

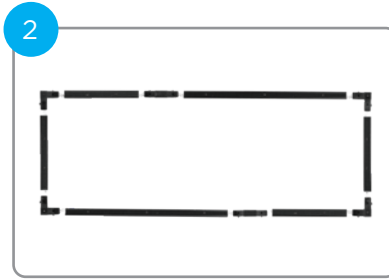

Scrim Jim Cine Frame Assembly

Scrim Jim Cine frame tubes, corner connectors, straight connectors, and fabrics are packaged unassembled and may be purchased separately or in complete kits. Visit fjwestcott.com for complete listing of available options.

Locate Components

Begin by locating the included Scrim Jim Cine frame tubes and connectors. Refer to the Build Options for configuration options and required components.

Arrange Components

On a flat surface, position frame tubes and connectors next to each other in the proper order. Align the connectors' positive-locking buttons with the button receptacles on the frame tubes.

Connect Frame Tubes

Connect any included straight frame connectors with their corresponding frame tubes first. Next, connect each end of a full frame tube to corner connectors. Press and hold the positive-locking button and slide the frame tube into place. The button will 'click' when connected properly.

Repeat Corner Connections

Connect the open ends of the parallel frame tubes with 2 corner connectors.

Frame Creation

Connect the 2 remaining straight frame tubes to the remaining open ends of the connected corner connectors to create your frame.

Build Options: 1' x 1' and 1' x 2'

Visit fjwestcott.com for complete listing of frame, fabric, and mounting options.
