

# The Rock

## Rodent Bait Station

### The Rodent Station that Blends into Your Garden Environment

Yet doesn't cost the earth!

It's called The Rock since it is designed to resemble a natural rock, while in fact it is a Rodent Bait Station that is large enough for a both rats and mice to enter and feed in safety. It blends naturally into an outdoor garden environment where the natural sandstone texture ensures it does not look out of place.

When **MUSKIL® Dual Active Rodenticide Blocks** or **RODENTHOR Soft Bait** is added to the discreetly concealed bait drawer, it is bound to lure rats or mice in for a deadly feed!

With a single lock, using the same key as the rest of the RODENTHOR Rodent Bait Station range, it provides security against tampering, together with easy opening and closing. Once unlocked the Bait Drawer slides out for easy filling or checking.

And a supplied tether stake enables you to anchor it in place.

The RODENTHOR Rock Rodent Bait Station is made of heavy-duty, injection-moulded plastic with a drain hole in the

Bait drawer is easy to use.
