Poisons Information Centre: 13 11 26 from anywhere in Australia, (0800 764 766 in New Zealand)

Section 3 - Composition/Information on Ingredients

Ingredients	CAS No	Conc., %	TWA (mg/m ³)	STEL (mg/m ³)
Natural food items of plant and animal origin	Various	100	not set	not set

This is a commercial product whose exact ratio of components may vary slightly. Minor quantities of other non-hazardous ingredients are also possible.

The SWA TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5-day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

Section 4 - First Aid Measures

General Information:

You should call The Poisons Information Centre if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 11 26 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Have this SDS with you when you call.

Inhalation: First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

Skin Contact: First aid is not generally required. Irritation is unlikely. Wash gently and thoroughly with water (use non-abrasive soap if necessary) for 5 minutes or until product is removed.

Eye Contact: Quickly and gently brush product from eyes. No effects expected. Flush contaminated eye(s) with lukewarm, gently flowing water until the product is removed. Take special care if wearing contact lenses. Contact a Poisons Information Centre, or call a doctor if symptoms occur.

Ingestion: If swallowed, do NOT induce vomiting. Wash mouth with water. Contact a Poisons Information Centre, or call a doctor if symptoms occur. Treat as a food allergy.

Section 5 - Fire Fighting Measures

Fire and Explosion Hazards: The major hazard in fires is usually inhalation of heated and toxic or oxygen deficient (or both), fire gases. There is no risk of an explosion from this product under normal circumstances if it is involved in a fire.

Fire decomposition products from this product may be toxic if inhaled. Take appropriate protective measures.

Extinguishing Media: This product is neither flammable nor explosive. Use extinguishing media suited to burning materials.

Fire Fighting: If a significant quantity of this product is involved in a fire, call the fire brigade.

Flash point: Not applicable.

Upper Flammability Limit: Not applicable.

Lower Flammability Limit: Not applicable.

Autoignition temperature: Not applicable.

Flammability Class: Not applicable.

Section 6 - Accidental Release Measures

Accidental release: This product is sold in small packages, and the accidental release from one of these is not usually a cause for concern. In the event of a major spill, prevent spillage from entering drains or water courses.

Section 7 - Handling and Storage

Handling: No special instructions required.

Storage: Store in the closed original container in a dry, cool, well-ventilated area out of direct sunlight. Make sure that the product does not come into contact with substances listed under "Incompatibilities" in Section 10. Check packaging - there may be further storage instructions on the label.

Section 8 - Exposure Controls and Personal Protection

No special equipment is usually needed when handling.

Ventilation: No special ventilation requirements are normally necessary for this product.

Eye Protection: Protective glasses should be worn when this product is being used.

Skin Protection: No special equipment is needed when handling.

Respirator: No personal respiratory protective equipment normally required.
