

EXTERRA
EVER-READY[®]
Total Termite Protection System

ADVANCED ELIMINATION OF TERMITE COLONIES

**ACTIVE
ON
INSTALL!**

ALWAYS ON GUARD & EVER READY TO DEFEND YOUR HOME FROM TERMITE ATTACK

EXTERRA EVER-READY is a unique, environmentally responsible solution, defending your home from termite infestations with its EVER-READY EZ Stations linked together, forming a complete Termite Interception Zone™, providing a protective shield right around your home.

TOTAL ELIMINATION OF TERMITES

EXTERRA EVER-READY®

TERMITE COLONY DEFENCE SYSTEM

EXTERRA EVER-READY is the latest advance in termite colony elimination from Ensysstex, the global leader in this field. **EXTERRA EVER-READY** is designed to continuously safeguard your home, always ready and able to intercept and eliminate termite colonies – from the moment of install, and every moment of every day thereafter.

EXTERRA EVER-READY is a unique, environmentally responsible solution, defending your home from termite infestations with its EVER-READY EZ Stations linked together, forming a Termite Interception Zone™, to provide a protective shield right around your home.

EXTERRA EVER-READY uses the World's Number One Termite Bait, REQUIEM®, present in a natural Termite Bait Disk Sack, to provide this extended, continuously active protection.

The EVER-READY Defence Shield

The EZ Stations are linked to each other by FOCUS Termite Attractant™ which forms a Termite Interception Zone between each EZ Station to effectively surround your home, greatly improving its termite defences. FOCUS Termite Attractant is a non-toxic, food based product that interacts with naturally occurring microbes in the soil to mimic the gaseous odours given off naturally by the decaying timbers that termites prefer to feast upon. It creates a natural, gaseous trail for the termites to follow into the EZ Stations, defending against termites passing between Stations, as can so easily happen with other systems.¹

A REQUIEM EVER-READY Termite Bait Disk Sack® is secured in each EZ Station. Containing the most palatable termite bait on the market. This means your EXTERRA EVER-READY Termite Protection System is active from the start. Any termites present in the vicinity of your home are going to be actively intercepted. The colony elimination process will commence as soon as the termites start feeding on the bait.

KILLS THE ENTIRE COLONY INCLUDING THE QUEEN

The worker termites will feed the REQUIEM through the entire colony, ensuring the entire colony, including the queen (and king) termites, are eliminated. But don't just take our word for this, there are more than a dozen, peer-reviewed, published, scientific papers from leading researchers, that confirm the efficacy and palatability of REQUIEM Termite Bait. That's clever science that other systems can't show!

Your EXTERRA professional pest manager will periodically inspect the EZ Stations and replenish them as required. EXTERRA EVER-READY provides you the added security of knowing that, even if a scheduled inspection is delayed, the EZ Stations are always actively charged with termite killing bait, so your home is better protected.

After eliminating any attacking colonies, fresh REQUIEM EVER-READY Termite Bait is placed in the EXTERRA EZ Stations, so they continue to defend your home against future invasions, offering you a long-term termite protection system that's easy on the environment.

**Your home is securely
protected by the complete
and continuous Termite
Interception Zone.**

¹ FOCUS Termite Attractant has been proven to work in peer-reviewed, published scientific studies.

EXTERRA
EVER-READY[®]
Total Termite Protection System

- ✓ Most palatable termite bait on the market.
- ✓ Exclusive Termite Interception Zone protects your home.
- ✓ FOCUS Termite Attractant draws termites into the Stations.
- ✓ Safe for you, your pets and the environment.
- ✓ Eliminates the Termite Colony.

REQUIEM EVER-READY Termite Bait Disk Sacks

REQUIEM EVER-READY Termite Bait uses untreated natural cellulose to provide the most palatable termite bait on the market. Unlike leading competitors, our cellulose is not chemically treated to make it look white and pretty, and it does not contain any plastic polymers. This is why termites love it so much.

To protect the bait and ensure its longevity in the soil around your home, the bait disks are encased in a natural jute fibre 'sack'; ensuring a sustainable natural solution for your termite protection program. Not only does this provide a more environmentally responsible solution than the plastic cartridges used in other systems, the jute fibre itself is edible to termites, which adds to the attractiveness of the EXTERRA EVER-READY program.

**An
Environmentally
Responsible
Solution**

Help! The Termites are Already in my House!

Relax. Your EXTERRA[®] professional pest manager will place EXTERRA Above-ground Stations on the areas where the termites are actively feeding. REQUIEM Termite Bait is placed in these child-resistant, sealed Stations when they are installed. Since termites consider REQUIEM to be a gourmet food treat, they will readily feed on the REQUIEM in preference to the timbers in your home. This speeds up the process of colony elimination.

Once the termite colony is eliminated, the Above-ground Stations are removed, leaving the EVER-READY EZ Stations in place outside, to keep defending your home.

A Safer, Environmentally Friendly Way to Eliminate Termites

EXTERRA EVER-READY utilises closed and locked Stations with a termite bait that is less toxic than table salt. **EXTERRA** is designed to specifically target termites only. The active component prevents the termites from moulting successfully, leading to their demise. Since this active is specific to insects, and because it is secured in underground Stations that target only termites, it provides a safer, more natural approach to solving your termite problem.

You get secure protection, a product that eliminates the entire termite colony, that does so without harming the environment, and is safe for you, your family, your pets, and our native wildlife. **EXTERRA EVER-READY** has no effect on bees, ladybirds, and other desirable insects.

At EXTERRA we truly care about the natural environment and remain proud supporters of Australian Wildlife Conservancy.

Your **EXTERRA EVER-READY** Professional

Termites can destroy a home in just a few months. They live in colonies that can contain more than a million timber devouring insects that will travel more than 75 m in search of timbers to feast on. Your home provides a smorgasbord of timber and cellulose goods for them to devour. Australian termites are truly the most destructive timber pests in the world, causing hundreds of millions of dollars of damage every year to Australian homes.

Given the devastation that termites cause, you need a professional approach to their elimination. DIY systems are not worth the risk. This is why **EXTERRA EVER-READY** is only available through licensed professional pest managers, trained and authorised by **EXTERRA** to install your termite defence system.

Installation involves little to no disruption around your home. There is no need to treat the soil or dig trenches. The slim EZ Stations containing the termite bait are simply inserted into the ground, there is no mixing and no mess.

All **EXTERRA** professionals complete an in-depth training program and undertake on-going professional development as part of the **EXTERRA** Quality Care program.
