APVMA Approval No. 81919/104417

Net Contents:

120 g (4 x 30 g Syringes)

ENSYSTEX®

DIRECTIONS FOR USE:

RESTRAINTS

DO NOT apply to a ground surface which is wet or to areas that are washed.
DO NOT allow product to directly contact humans, pets, exposed food, food preparation areas, food utensils or food packing materials.

SITUATION

Commercial, Industrial and Residential Buildings including food processing premises.

PEST

German and American cockroaches.

RATE

Apply as a 5 mm (0.1 g) diameter bait spot. Apply 2 bait spots per m² and up to 5 spots for heavy infestations.

CRITICAL COMMENTS

- Inspect premises thoroughly and locate all cockroach harbourages.
- Place ZENITHOR bait spots as close as possible to cockroach harbourages.
- Place bait spots into cracks and crevices away from where they are likely to be removed by cleaning programs.
- When placing baits remember that the label refers to the full surface area that the cockroaches are likely to traverse e.g. in a kitchen allow for the full surface area of each bench, cupboard, etc.
- Good hygiene is essential in any pest management situation. Encourage the removal of other food materials.
- Do not use chemical sprays near baits.
- In areas of poor sanitation use more bait placements.

RETREATMENT:

In areas of high activity the bait may be consumed and further placements needed. Schedule a second inspection about a month after the initial treatment. Retreatments only need to be applied in areas where cockroaches remain or are likely to enter a premises. ZENITHOR is very stable; it does not harden or lose its attractiveness to cockroaches. Only reapply baits when the original bait has been consumed.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

Insecticide Resistance Warning

GROUP 22A INSECTICIDE

Batch Number:

Date of Manufacture:

Some naturally-occurring insect biotypes resistant to ZENITHOR Gel Cockroach Bait and other Group 22A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if ZENITHOR or other Group 22A insecticides are used repeatedly. The effectiveness of ZENITHOR on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Ensysstex Australasia Pty Ltd accepts no liability for any losses that may result from the failure of ZENITHOR to control resistant insects.

ZENITHOR may be subject to specific resistance management strategies. For further information contact Ensysstex Australasia Pty Ltd or a local agricultural department agronomist.

PROTECTION OF LIVESTOCK, WILDLIFE AND OTHERS

DO NOT contaminate streams, rivers or waterways with the chemical or used containers. DO NOT apply this product in any areas easily accessible to children or animals.

STORAGE AND DISPOSAL

Store in the closed, original container in a dry, cool, well-ventilated area out of the reach of children.

Do not store in direct sunlight. Dispose of empty container by wrapping in paper, placing in a plastic bag and putting in the garbage.

SAFETY DIRECTIONS

Wash hands after use.

FIRST AID

If poisoning occurs, contact a Doctor or Poisons Information Centre. Phone: Australia 13 11 26.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet which is available from Ensysstex on request. Call Customer Service 13 35 36 or visit our web site at www.Ensysstex.com.au.
