TOXICITY

Harmful – May cause skin sensitisation from prolonged skin contact. Avoid skin contact.
May cause organ damage from repeated oral exposure at high doses.

ECOTOXICITY

Harmful to aquatic organisms with long-lasting effects. Avoid contamination of any water supply with product or empty container. This substance must not be applied into or onto water.

Toxic to terrestrial invertebrates

PRECAUTIONS

Keep out of reach of children and pets. Avoid contact with skin and eyes. Wash hands and exposed skin before meals and after work. Do not eat, drink or smoke when using this product.

FIRST AID

If poisoning occurs, contact the National Poisons Centre. Phone 0800 POISON (0800 764 766) or a doctor immediately. If in eyes, wash out with running water for at least 15 minutes. If on hair or skin, wash with plenty of soap and water.

DIRECTIONS FOR USE:

RESTRAINTS

Do NOT apply to a ground surface which is wet or to areas that are washed. Do NOT allow product to directly contact humans, pets, exposed food, food preparation areas or food utensils.

SITUATION: Commercial, Industrial and Residential Buildings including food processing premises.

PEST: German and American cockroaches.

RATE: Apply as a 5 mm (0.1 g) diameter bait spot. Apply 2 bait spots per m² and up to 5 spots over heavy infestations.

CRITICAL COMMENTS

- Inspect premises thoroughly and locate all cockroach harbourages.
- Place ZENITHOR bait spots as close as possible to cockroach harbourages.
- Place bait spots into cracks and crevices away from where they are likely to be removed by cleaning programs.
- When placing baits remember that the label refers to the full surface area that the cockroaches are likely to traverse e.g. in a kitchen allow for the full surface area of each bench, cupboard etc.
- Good hygiene is essential in any pest management situation. Encourage the removal of other food materials.
- Do not use chemical sprays near baits.
- In areas of poor sanitation use more bait placements.

RETREATMENT:

In areas of high activity, the bait may be consumed and further placements needed. Schedule a second inspection about a month after the initial treatment. Retreatments only need to be applied in areas where cockroaches remain or are likely to enter a premises. ZENITHOR is very stable; it does not harden or lose its attractiveness to cockroaches. Only reapply baits when the original bait has been consumed.

STORAGE AND DISPOSAL

Store in the closed, original container in a dry, cool, well-ventilated area out of the reach of children. Do not store in direct sunlight. Dispose of empty container by wrapping in paper, placing in a plastic bag and putting in the garbage.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet which is available from Ensyslex.
