Each Sack contains (6 x 40 g) REQUIEM EVER-READY Termite Bait Disks which it is illegal to sell separately

APVMA Approval No. 90707/129851

ENSYSTEX AUSTRALASIA PTY LTD ABN 53 102 221 965 Warehouse D, Building 6, The Switchyard 161 Manchester Road Auburn NSW 2144 www.Ensystex.com.au

CUSTOMER SERVICE 13 35 36

Carton Contains 20x EXTERRA EVER-READY EZ Stations, each pre-loaded with 1x REQUIEM EVER-READY Termite Bait Disk Sack

DIRECTIONS FOR USE:

(ACT, NSW, NT, Qld, SA, WA, Vic only)

REQUIEM EVER READY Termite Bait Disk Sacks must be used only as part of an integrated termite management program by termite specialists approved by Ensystex Australasia Pty Ltd to use the EXTERRA EVER-READY Termite Protection System.

| Situation | Pest | Rate | Critical Comments |
|--|---|--|---|
| For use in Integrated Termite Management Programs in and around residential and com- mercial properties, including food handling establishments, and other areas where termite presence can be detected e.g. fences, utility poles, trees, bridges, wharves and landscape structures in all areas of Australia except Tasmania. | Subterranean termites (except <i>Mastotermes</i> <i>darwiniensis</i>) | Add 1 or 2 REQUIEM EVER-READY TERMITE BAIT DISK SACKS to each EXTERRA® In-ground Station | Add Sacks as necessary to approved EXTERRA Stations or directly into termite workings. Use the higher number in areas of known high termite activity. Replenish as required. When handling the Disk Sacks wear disposable latex rubber gloves to ensure odours or contaminants that may deter termite feeding are not transferred to the bait matrix. Can be used to protect new and existing structures. |

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL INSTRUCTIONS

REQUIEM EVER-READY Termite Bait Disk Sacks are used only with proprietary In-ground Stations supplied by Ensystex. The REQUIEM EVER-READY Termite Bait Disk Sacks must remain in place at all times.

In-ground stations containing REQUIEM EVER-READY Termite Bait Disk Sacks are embedded in the soil around the perimeter of the structure at intervals of 3-5 metres. Station placement is focused in areas where termites are most likely to be found foraging. These Stations are inspected on a regular basis as determined by the termite species and the site conditions.

When the colony has been eliminated, fresh REQUIEM EVER-READY Termite Bait Disk Sacks are placed in the Stations.

REQUIEM EVER-READY Termite Bait Disk Sacks should be replaced after 12-months with fresh REQUIEM EVER-READY Termite Bait Disk Sacks.

Termite management

To minimise the risk of termite infestation, the subfloor area of buildings should be kept free of stored or waste timber and all other building materials that attract termites. Appropriate action should also be taken to eliminate any undue dampness caused by leaking water or sewerage pipes, or inadequate drainage.

Service requirement

Regular, competent inspections by a licensed Pest Manager are recommended as part of an overall termite management program to determine the prevailing termite pressure and environmental conditions and consequent requirement for further termite management options. Inspections should be performed at least on an annual basis, but more frequent inspections are strongly recommended.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to aquatic arthropods. DO NOT contaminate streams, rivers or waterways with the chemical or used containers. DO NOT place REQUIEM EVER-READY TERMITE BAIT DISK SACKS in any area where, because of movement of water or spillage when applying product, it could be washed into a body of water containing aquatic life, such as ponds or streams.

STORAGE AND DISPOSAL

Keep out of reach of children.

Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Triple-rinse containers before disposal. Dispose of rinsate or any undiluted chemical according to state/territory legislative requirements. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

SPILLS

Sweep up material and wrap in paper. Dispose of as above. Prevent entry of spilled matter into drains or waterways.

FIRST AID

First aid is not generally required. If in doubt, contact a Poisons Information Centre (phone Australia 13 11 26; New Zealand 0800 764 766) or a doctor.

SAFETY DATA SHEET

Additional information is listed on the Safety Data Sheet for REQUIEM EVER-READY TERMITE BAIT DISK SACKS that is available from Ensystex on request. Call Customer Service on 13 35 36 or visit our web site at www.Ensystex.com.au.
