ENSYSTEX®

HSNO Classifications: 6.1E, 6.3B, 6.5B, 6.9B, 9.1A, 9.3B, 9.4A**TOXICITY**

Harmful – May be harmful if swallowed, inhaled or absorbed through the skin.
May cause eye irritation and sensitisation from prolonged skin contact.
May cause target organ damage from repeated oral exposure at high doses.

ECOTOXICITY

Very toxic to fish and aquatic organisms. Avoid contamination of any water supply with product or empty container. Product must not be applied onto or into water.
Toxic to terrestrial vertebrates.
Very toxic to terrestrial invertebrates such as bees. Spray must not be applied in areas where bees are foraging.

PRECAUTIONS

Keep out of reach of children. Avoid contact with skin and eyes and inhalation of spray mist.
When mixing and applying wear protective clothing such as goggles, waterproof gloves, cotton overalls and boots. Wash hands and exposed skin before eating, drinking and after work. Wash gloves and protective clothing daily.

DIRECTIONS FOR USE:

SITUATION	PEST	RATE	CRITICAL COMMENTS
Commercial, industrial and residential premises including hospitals, hotels, and food handling premises.	Crawling insect pests including cockroaches, stored product insects, flies, ants, bed bugs and vinegar flies.	50 mL per 5 L per 100 sq m treatment area.	Product placement should be at harbourages and aggregation areas such as corners, areas of movement or cracks and crevices. Numerous smaller placements will provide faster control than fewer larger spots especially for German cockroach control. Apply to skirting boards, floors and carpets, behind sinks, stoves, and pipes paying particular attention to all cracks and crevices which might contain insects. Apply to all areas where insects are seen, and known harbourages.

MIXING: Invert the ATTRATHOR container several times to ensure thorough mixing of concentrate. Half fill the spray tank with water and then add the required quantity of ATTRATHOR. Stir and then top up the spray tank to the required volume. The use of this product in a tank mix with other insecticides is not recommended as the behaviour and efficacy of the product is likely to be affected. Ensure equipment is clean.

GENERAL INSTRUCTIONS: ATTRATHOR Targeted Insecticide is recommended for use as a targeted indoor crack and crevice treatment. This substance must be under the personal control of an approved handler when it is
• applied in a wide dispersive manner; or
• used by a commercial contractor.

STORAGE AND DISPOSAL: Store in the closed, original container in a cool, well-ventilated area.

Do NOT store for prolonged periods in direct sunlight.

Triple or (preferably) pressure rinse containers before disposal. Add rinsings to the spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Do not burn empty containers or product.

FIRST AID: If swallowed wash out mouth with water.

Do NOT induce vomiting. Contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. If skin or hair contact occurs, flush with clear running water for at least 15 minutes. If inhaled remove patient to fresh air.

SDS: Additional information is listed in the Safety Data Sheet which is available from Ensyslex on request or visit our web site at www.ensystex.co.nz.

NOTICE: Ensyslex warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions or under abnormal conditions.
