SITUATION	PEST	RATE	CRITICAL COMMENTS
Interior & exterior areas & surrounds of commercial, industrial, rural and residential premises including hospitals, hotels, and food preparation areas.			For all uses: Apply using a low-volume (LV) fine mist spray. Recommended droplet size 30 -120 μ.
	Crawling insects including: cockroaches, fleas, spiders, beetles, silverfish, mites, millipedes, earwigs, crickets.	1 L water	Spray directly onto target pests to give complete coverage. Reapply as required, product provides no residual protection.
	Bed bugs		Direct spray to all areas of infestation (e.g. bed frames, mattresses, walls, cracks, crevices and skirting boards). Apply a follow up treatment after 21-28 days. If temperature exceed 30 °C follow-up after 14-days.
	Ants Flying insects including flies, moths, mosquitoes (indoors), wasps, hornets.	5-10 mL per 1 L water	Spray directly onto target pests to give complete coverage. Ideally apply topically in the evening when insects, especially flies are resting on surface and in crevices.
	Mosquitoes	1 mL per 1 L water	Spray directly onto target pests to give complete coverage. Apply to mosquito resting locations (small trees, bushes etc.)

GENERAL INSTRUCTIONS

EXONET is a novel formulation that gives rapid knockdown of insect pests. It can be used both indoors and outdoors. Avoid spraying near highly polished wax surfaces. Product may mark or darken absorbent surfaces. These marks should disappear within a few days but if in doubt, spray a small test area first.

EXONET can also be used as a tank mix with traditional insecticides to provide faster knockdown and enhance control of chemically resistant strains.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Do NOT contaminate streams, rivers or watercourses with the chemical or used containers.

Toxic to aquatic life with long lasting effects.

PROTECTION OF PETS AND LIVESTOCK

Remove or cover all open food and water containers.
