

PERMETHOR® SHIELD LIQUID INSECTICIDE

ACTIVE CONSTITUENT: 500 g/L PERMETHRIN
SOLVENT: 361 g/L HYDROCARBON LIQUID

*The Optimal Solution for protecting
Timber, Carpets and Fabrics against a
range of damaging insects*

PERMETHOR® SHIELD is a low odour emulsion concentrate insecticide that provides long-term control of a wide range of insect pests in a wide range of situations. It is particularly suited for protecting a range of materials including timber, fabrics, carpets, aircraft, and industrial, commercial and residential properties from pest infestation.

For maximum flexibility PERMETHOR SHIELD can be diluted with water, deodorised kerosene, or non-staining light oils.

PERMETHOR SHIELD is particularly suited to providing outstanding residual control of borers and dry-wood termites and for internal treatment for moth protection and beetle attack.

Provides long-lasting residual protection to a wide-range of different materials and surfaces;

- ✓ Effective at low concentrations with broad spectrum of activity
 - > Drywood termites
 - > Carpet pests
 - > Mosquitoes and biting flies
 - > Timber beetles
 - > Quarantine pests on aircraft
 - > Urban pests
- ✓ High level of safety when used in accord with the product label

AREAS OF USE: Industrial, commercial and domestic situations, lawns, aircraft, fabric and timber protection.

TARGET PESTS

- Cockroaches
- Ants
- Silverfish
- Drywood termites
- Timber borers
- Fleas

Aircraft;

- Cockroaches
- Moths
- Beetles
- Mosquitoes

Repellent treatment of fabric and mosquito nets.

- Mosquitoes
- Biting insects

Even repellent treatment of clothing of ADF personnel.

How to get the best results with PERMETHOR SHIELD

1. ALWAYS complete a thorough inspection before treatment
2. Ensure diluted product is compatible with materials to be protected by testing a small area.
3. Prior to treatment for borers, timbers should be cleaned and lightly sanded for best results
4. Certain dry-wood termites e.g. *Cryptotermes brevis* are notifiable pests in Queensland. Ensure identification of frass is completed before treatment
5. This product has a low odour but you should check with your client prior to treatment.
