

# PERMETHOR®

## INSECTICIDAL DUST

The finest dust for professional pest managers. Your Number One choice for ready-to-use, broad spectrum control in roofs and wall voids. Flows deeper into cracks and voids to give you optimal results.

### PERMETHOR KEY FEATURES

- ✓ **Exceptionally light dust formulation;** To flow further and deeper into cracks, crevices and voids where pests are found. This ensures you are easily able to get the product where it will be most effective.
- ✓ **Odourless;** This means that, when correctly applied, your clients see little evidence of your actual treatment, simply a reduction in their pest problems.
- ✓ **Wide use;** A broad label that even includes control of European wasps and feral honey bees so you can target the broadest spectrum of pests.
- ✓ **Withstands heat;** Very low degradation in high temperatures to give you better results and fewer call-backs.
- ✓ **Finer dust;** To give you superior coverage to apply the finest of coatings to surfaces. The finer the dust coating the more likely the pests are to make contact and pick-up the insecticidal deposit providing you with long term effective control.
- ✓ **Non-sensitising;** Under normal usage conditions you can expect no sensitivity issues.
- ✓ **Long residual activity;** Of up to 6 months or more so you can provide your clients with long-term insect control and minimise call-backs.

### PERMETHOR PRODUCT DETAILS

<b>Active Ingredient:</b>	10 g/kg permethrin
<b>Insecticide Group:</b>	Pyrethroid
<b>Formulation Type:</b>	Ready to use dust
<b>Pests Controlled:</b>	Cockroaches, silverfish, ants, fleas, carpet beetles, bed bugs, spiders, bird mites, hide beetles, mushroom sciarid flies, potato moths, subterranean termites, European wasps and feral honey bees
<b>Pack Size/ Code:</b>	10 kg (CHERE1000) 5 kg (CHEPE1003)
<b>Resistance Group:</b>	3A

PERMETHOR is a pyrethroid insecticide. PERMETHOR was developed and formulated specifically for professional pest managers.

### PERFORMANCE

PERMETHOR dust is ideal for areas where liquid based formulations are not suitable. This includes large voids or areas where there is a risk of corrosion or spray drift to electrical equipment. For best results in roof or wall voids apply using a power duster. PERMETHOR is most effective when a fine coating only is applied. Ensure you use the lightest application of dust and avoid "mounds" of dust as insects will not pass through these.

PERMETHOR is also ideal for use as a flushing agent during inspections to identify cockroach and other pest harbourages. For the most effective control use PERMETHOR in association with a liquid spray to other pest harbourages and surfaces using products such as BITHOR, CLEPETHOR or MAXXTHOR.
