

Axus AXP2L Light Up Portable
Electronic Keyboard

Owner's Manual

NOTICE

Please read over the NOTICE before use!

⚠ NOTICE

- Dedicated power adapter shall be used, and in case of adaptor damage, replace it immediately
- The keyboard can only be disassembled by professionals, and no change can be made to the internal structure. In case of any functional abnormality during performance, stop performing immediately and send the keyboard to professionals for maintenance.
- When connecting the keyboard to other device, ensure both the keyboard and the device to be connected are powered off before connection.
- Do not turn and keep the volume to the maximum or to an uncomfortable degree for a long time when performing
- Keep the keyboard away from heat source to protect its parts from damage.
- Prevent liquid, dust, small particle and other foreign matters from entering the case of the keyboard, for which may result in element short circuit.
- Pull out the plug before cleaning the keyboard, and do not pull out the plug with wet hand.
- Please use dry and soft cloth to clean the keyboard. Paint, alcohol or other chemical solvents shall not be used for cleaning, for which may damage the keyboard surface.
- Please pull out the plug after performing or when the keyboard is left unused for a long time.
- **WARNING:** The direct plug-in adapter is used as disconnect device, the disconnect device shall remain readily operable.

- Correct disposal of this product. This marking indicates that this product should not be disposed with other household wastes throughout the EU.

To prevent possible harm to the environment or human health from uncontrolled waste disposal, recycle it responsibly to promote the sustainable reuse of material resources. To return your used device, please use the return and collection systems or contact the retailer where the product was purchased. They can take this product for environmental safe recycling.

II. Preparation before Playing

● AC/DC Power Adaptor

A dedicated AC/DC power adaptor shall be used. Connect the output end of the adaptor to the power port on the rear panel of the keyboard, and then the other end to the power socket. (Note: The input voltage of the adaptor shall be compatible with the power supply voltage)

● Audio Output / External Headphone

◆ Audio output: firstly, turn off the keyboard and the external audio devices, secondly, connect one end of the audio cable to the PHONES/OUTPUT port on the rear panel of the keyboard, and then connect the other end to the audio input port of the audio device.

◆ Headphone connection: When connecting a headphone to the PHONES/OUTPUT port on the rear panel of the keyboard, the loudspeaker will be disabled automatically. In this way, you can play the keyboard without disturbing others.

※ Note! When using headphone, do not turn up and keep the volume to the maximum for a long time, for which may cause hearing loss.

● Mic Input and Audio Input

◆ Mic input: connect a microphone to the MIC port, and then you can sing while playing the keyboard.

◆ With the stereo input function, sound signals from mobile phone, MP3 player, computer and other audio devices can be input into the keyboard system for playing. Firstly turn off the Keyboard, then, connect one end of audio cable to the output port of an audio device, and the other end to the AUDIO INPUT port on the rear panel of the Keyboard, finally, turn on the keyboard.

● MIDI Interface

The keyboard is provided with USB-MIDI interface, which can be used for connection with mobile phone and laptop. Firstly, download APP training software, and connect the keyboard with the intelligent equipment, which may facilitate training and learning.

Connection method:

The USB-MIDI interface on the keyboard can also be used for connection with music equipment and computer with MIDI. Melody played with this keyboard can be output to the computer, and further recording, composing and editing can be realized through computer and software. In addition, MIDI music stored in the computer can be input to the keyboard for playing.

Connection Method:

(1) Connect the keyboard and computer with common USB cable, and press the power ON/OFF button.

(2) Install the music editing software (such as CAKEWALK) in the computer, and launch the software, and then select MIDI input and output interface in the software.

III. Basic Playing Method

Press [Power ON/OFF], LCD screen will turn on and show the current tone, tempo, volume and other status. The luminous function is enabled by default.

● Key Light

With the luminous keyboard, when under the modes of playing, luminous keyboard three-step training, demo song playing and USB-MIDI music input, the keyboard will light on for instruction. The luminous function is defaulted to be enabled, press [KEY LIGHT] to enable or disable the luminous function.

● Master Volume Adjustment

Press [Master Vol ▲] or [Master Vol ▼] to turn up or turn down the master volume. Press [Master Vol ▼] and [Master Vol ▲] simultaneously to reset your keyboard to the default values.

The master volume can also control the rhythm volume and the chord volume.

● Timbre Selection

The keyboard provides 512 timbres, from "000" to "511" for your selection. When starting the keyboard, the timbre selection function will be activated automatically, and "Tone" will show on the screen. In the absence of "Tone", Press [TIMBRE] to enable to tone selection function. The timbre is defaulted to be "000", and it can be adjusted by pressing the corresponding number buttons or pressing the "+" / "-" buttons.

● Keyboard Percussion

Press [Keyboard Percussion] to activate the percussion function. Under this mode, users can play the keyboard to produce corresponding percussions. Press this button again to disable the keyboard percussion function.

● Playing Demos

65 demos are stored in the keyboard, from "000" to "064" for your selection. Press [Demo Song], and the demo song will play in order, and you can press the "+" / "-" buttons to select other demo.

When playing the songs, you can press the number buttons to select the corresponding demos, and the selected demos will play in a loop.

IV. Auto Rhythm

● Rhythm Selection

This Keyboard provides 260 rhythms, from "000" to "259" for your selection, and the default rhythm is "000". Press [Rhythm] to enable the rhythm selection function, and "RHYM" will show on the screen. Then press the number buttons or the "+" / "-" buttons to select other rhythms:

● Rhythm Control

1. Rhythm Enabling

- ◆ Press [start/stop] to start accompaniment.
- ◆ When the rhythm function is inactivated, press [Sync], metronome will flash on the screen. Then play any key in the chord key zone (the 1st-19th key, from left), the accompaniment rhythm will be activated.

2. Interlude

After the rhythm is activated, press [Fill-in] and an interlude will be automatically inserted into the rhythm.

3. Stop Rhythm

During the accompaniment rhythm, press [Start/Stop] to stop the accompaniment rhythm.

● Metronome

The metronome contains four tempos, 1/4, 2/4, 3/4 and 4/4, respectively. Press [Metronome] continuously to select four tempos one by one. Press [Metronome] again to stop the tempo.

● Tempo Adjustment

Press [Tempo +] or [Tempo -] to increase or decrease the rhythm speed, and press the two buttons at the same time to reset to the default.

● Rhythm Volume Adjustment

Press [Rhythm Vol ▲] or [Rhythm Vol ▼] to turn up or turn down the rhythm volume. Press [Rhythm Vol ▲] and [Rhythm Vol ▼] at the same time to reset to the default.

V. Auto Bass Chord

● Fingered Chord

Press [Fingered] to enable the chord function, and "Finger" will show on the screen. Under the rhythm activated mode, you can play in the chord key zone (the 1st-19th key, from left) with fingered chord fingering to obtain automatic chord accompaniment; while under the

rhythm disable mode, you can play chord accompaniment manually.

Press [Fingered] or [Chord OFF] to disable the chord function, and "Finger" will disappear from the screen.

● Single Chord

Press [Single] to enable the chord function, and "Single" will show on the screen. Under the rhythm activated mode, you can play in the chord key zone (the 1st-19th key, from left) with single chord fingering to obtain automatic chord accompaniment; while under the rhythm disable mode, you can play chord accompaniment manually.

Press [Single] or [Chord OFF] to disable the chord function, and "Single" will disappear from the screen.

Fingered Chord Fingering (C Key)

(The C key fingered chord fingering is as shown in the following figure, and the rest can be obtained by analogy)

● Chord Volume Adjustment

Press [Chord Vol ▲] or [Chord Vol ▼] to turn up or turn down the chord volume. Press [Rhythm Vol ▼] and [Rhythm Vol ▲] at the same time to reset to the default.

● Chord Mat

During playing, you can press any of the Chord Mat buttons (1, 2, 3, 4) to add a section of broken background chord to enhance the melody.

VI. Effect Control

● Transposing

With the transposing function, you can play music of other tunes with C-tune fingering method. Press [Transpose ▼] to decrease the tone by half (minor second), and the tune in C-tune keyboard zone will change to B-tune. Press [Transpose ▲] to increase the tone by half (minor second), and the tune in C-tune keyboard zone will change to #C tune or bD tune. By pressing [Transpose ▼] twice, C-tune will shift to bB-tune; by pressing [Transpose ▲] five times, C-tune will shift to F-tune. Press [Transpose ▲] and [Transpose ▼] at the same time to reset to C-tune "0". Press [Transpose ▲] and [Transpose ▼] to adjust the level from "-6" to "6".

● Tuning

You can press [TUNING ▲] / [TUNING ▼] to conduct fine pitch correction by adjusting the fine adjustment level from "-99" to "99". Press the two buttons at the same time to reset to the default "00", and the it will back to the normal standard keyboard. This function is quite useful for tune correction during band ensemble.

● Sustain

Press [Sustain], "SUS" will show on the screen, and the sustain effect will be activated. Press [Sustain] again to disenable the sustain function, and "SUS" will disappear from the screen.

● Pitch Bend

The pitch bend can realize tonal variation. You can increase the pitch by turning up the pitch bend and decrease the pitch by turning down the same. When released, the pitch bend will go back to the center position, and the pitch will return to the standard state.

● Vibrato

When [Vibrato] is in the low position, the Vibrato function is disenabled. You can enable this function by turning up the bar, and 'VIB' will show on the screen. The Vibrato function can add vibrato effect for the instruments. You can increase or reduce the vibrator effect by tuning up or turning down [Vibrato].

● Dual

When the dual function is enabled, "Double" will show on the screen. Under this mode, you can obtain an overlaid tone effect. Press [Timbre] to shift between Timbre 1 and Timbre 2 as needed, and the corresponding "TONE 1" and "TONE 2" will show on the screen.

● Keyboard Splitting

When enabling the Split function, "Split" will show on the screen. 24 keys on the left will split from the keyboard, while the left keyboard zone will increase by one octave and maintain the original tone.

● Touch

Press [Touch] to enable or disable the touch function. This function is defaulted to be enabled, and "Touch" shows on the screen. With this function, you may enhance the expression of the melody. It may accurately reflect the force you need to apply on each note. The larger the force is, the louder the sound will be. When this function is enabled, the sound will be equal regardless of what the force you apply.

VII. Recording

● Recording

Press [REC] to enable the recording function, and "Record" will show on the screen. Under this mode all notes played will be recorded.

※ The recorded notes will be cleaned upon recording or shutdown of the keyboard.

● Stop Recording

- ◆ When the storage is full, "Full" will show on the screen, and recording will stop automatically.
- ◆ During the recording process, you can press [PLAY] to stop recording and play the recorded notes.
- ◆ Press [REC] to disable the recording function, and all recorded notes will be cleaned.

● Records Playback

- ◆ When the recording function is enabled, press the [PLAY] to playback the record.
- ◆ During playback process, you can press [PLAY] again to stop playback.

VIII. Rhythm Programming

● Rhythm Programming

Press [PROG] to enable the rhythm programming function. "Program" will show on the screen, and the keyboard percussion will be activated. Under this mode, you can create custom rhythms by playing the corresponding percussion keys.

※ The programmed rhythm will be cleaned upon reprogramming or shutdown of the keyboard.

● Stop Programming

- ◆ When the maximum of 32 pieces of percussion music are recorded, "Full" will show on the screen, and programming will stop automatically.
- ◆ During the programming process, you can press [PLAY] to stop programming and playback the programmed rhythm.
- ◆ Press [PROG] to disable the rhythm programming function and clean all programmed data.

● Programmed Rhythm Playback

- ◆ When the programming function is enabled, press [PLAY] to playback programmed rhythm.
- ◆ During playback process, you can press [PLAY] again to stop playback.

IX. Status Memory

With the status memory function, you can save the tone, tempo, speed and other parameters set during playing. This keyboard is equipped with 4 status memories, which can be flexibly called at any time during playing.

● Storage of Status Memory

Set the tone, rhythm and tempo as required, and then press [Memory] and one of [M1] to [M4] to save the current status.

● Calling of Status Memory

Press any one of [M1] to [M4] to call the parameters saved under this memory to replace the current status.

※ No power failure protection is provided for the saved contents, so the saved contents will loss after the electronic keyboard is restarted after power cut.

X. Intelligent Three-step Luminous Key Training

The intelligent training function consists of three steps, which can guide the learner to play the keyboard step by step. Firstly, the learner can practice by following the guidance of step one "One Key" to get familiar with the melody and beat, and then move to the step two "Follow". After being able to play the melody with the keyboard, the learner may forward the

step three “Ensemble”, and through practice, the leaner may finally be able to ensemble with others.

● Training 1: One Key

Press [One Key] to enable the one key training function, and “Step 1” will show on the screen. You can press the “+”/“-” buttons to select the song to be learned.

Single Key training aims at duration learning, and there is no requirement for pitch or correctness. This mode allows mistakes when playing the keys, but the keyboards still plays correct notes, and the luminous keys will light on according to the correct notes of the melody, indicating the correct note to be played, and you can play by following the guidance of the luminous key. In a meanwhile, the key zone in the screen will also show the correct notes.

Press [One Key] to disenable the training function.

● Training 2: Follow

Press [Follow] to enable the Follow training function, and “Step 2” will show on the screen.

You can press the number buttons or the “+”/“-” button to select the song to be learned. The luminous keys will light on according to the correct notes of the melody, indicating the correct note to be played, and you can play by following the guidance of the luminous key.

You can also learn how to play by following the indicators in the key zone of the screen. In case of misplay, the melody will stop until you play the correct notes.

Press [Follow] again to disenable the follow training function.

● Training 3: Ensemble

Press [Ensemble] to enable the Ensemble training function, and “Step 3” will show on the screen. You can press the number buttons or the “+”/“-” buttons to select the song to be learned.

The ensemble training aims at the correct and comprehensive learning of the song duration and notes. The keynote will be shielded for ensemble, and you need to play the correct note according to the correct duration of the song. If you fail to play within 3 seconds, the keyboard will automatically play the correct note. The luminous keyboard will light on according to the main melody notes, indicating the note to be played, and you can play by following the guidance of the luminous key. The keyboard zone in the screen will show the correct note and tempo.

Press [Ensemble] again to disenable the Ensemble training function.
