DURA Dura Weave

Key Features

Mesh

The beautiful, strong and durable mesh for its seat and backrest. The stronger and light weight, high performing eco-friendly material, provides Bea the quality support that users expect in a premium ergonomic chair.

X Contour Backrest

Designed with the X Contour backrest features an unique subsystem which allows better support to the upper and lower back. With the X shape back frame it supported our back and spine with a wider range of postures and support points.

Lumbar Back Support

Lumbar Back Support Designs with a 3D built in lower back lumbar support, the countoured back support keeps the spine supported in its natural S-Shape.

MegArmRest

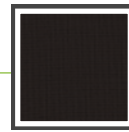

The MegArmRest that allows adjustments to the armrest's height, angles and directions. The MegArmRest Extra Large surface provides ample support to the elbows and arms comfortably while seated on the Bea ergonomic chair, regardless of your height, angles or directions.

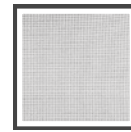

DuraWeave Heavy Lycra Mesh is a robust and versatile fabric, perfect for demanding applications requiring both durability and flexibility. Constructed from a blend of 90% Nylon and 10% Lycra, this mesh offers excellent 4-way stretch and a stiffer body compared to standard Lycra meshes. Ideal for use in mesh gear pockets, ventilation fabric for heavy-duty clothing, and pack frame support, DuraWeave ensures reliable performance even in challenging conditions.

Here are 4 key features of DuraWeave:

- 1. 4-Way Stretch:** Offers exceptional flexibility, making it suitable for various applications requiring stretch and durability.
- 2. Heavy-Duty Construction:** The blend of Nylon and Lycra provides a sturdy yet flexible fabric that withstands rigorous use.
- 3. Enhanced Ventilation:** Ideal for use as ventilation fabric in clothing, ensuring breathability and comfort.
- 4. Tightly Woven:** The mesh is tightly woven for added strength, making it perfect for supporting structures like pack frames.

How to Perfectly Adjust Your Bea Ergonomic Chair for Maximum Comfort

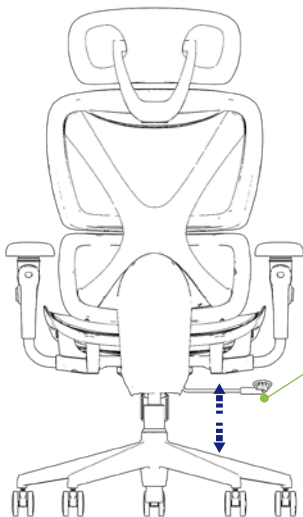

Vertebrae Assist

- **Dynamic Adjustment:** There are several hinges linking the back frame with the backrest and lumbar support, allowing the backrest and lumbar to dynamically change their angle according to the new human body curve.

Backrest Adjustment

- **Four Angle Options:** The backrest can be adjusted to four different angles, providing customized support for various sitting positions.
- **Simple Operation:** Pull out to lock, push in to unlock.

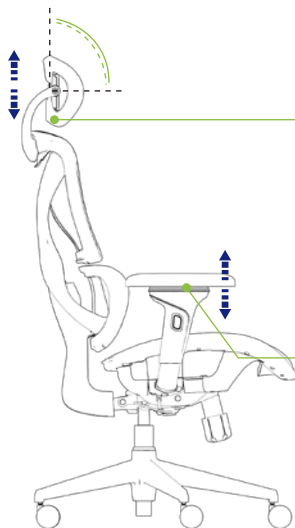

Tilt tension adjustment

- **Simple Operation:** Adjust the tilt tension by rotating the knob (clockwise to tighten, counterclockwise to loosen).

Seat Height Adjustment

- **Raising:** Stand up and lift the control lever located on the right side of the chair upward to raise the seat to the desired height. After releasing the control lever, the chair will be fixed at the adjusted height.
- **Lowering:** Sit on the chair and lift the control lever located on the right side of the chair upward to initiate the descent. Release the control lever when the desired height is reached, and the chair will be fixed in place.

Headrest Adjustment

- **Stretch Range 60mm:** The headrest can be adjusted within a 60mm range, providing customizable support for your head and neck.
- **Rotation 35°:** The headrest can rotate up to 35 degrees, allowing for precise positioning to match your ergonomic needs.

MegArmRest Adjustment

- **Up-Down:** The armrests can be adjusted vertically to accommodate different arm lengths and sitting positions.
- **Forward-Backward:** The armrests can move forward and backward to provide optimal support for various tasks.
- **Rotation 30°:** The armrests can rotate 30 degrees, enhancing flexibility and comfort for your arms and wrists.
