

Capability Statement

Trijent is a small business located in Macy, IN that has created and produces the patented Mech-loader, a speed-loader for clipped ammunition loaded into 5.56 NATO Standard Magazines.

Core Competencies

- Small Arms, Ordnance, and Ordnance Accessories Manufacturing
- Small, agile business with internal R&D department
- Company owns internal manufacturing, assembly, and distribution
- Made in the USA and Berry Amendment compliant
- Product delivery within 10 days time of order placement

Bench
mounted
model

Mobile
model

*Both models accept all M4 magazines

Differentiators

- The only loader that uses mechanical leverage to make loading both faster and easier, such that anyone can load regardless of physical ability
- Enables a user to load over 100 rounds per minute at a sustained rate
- Ammunition loaded by this device can only be loaded in the correct orientation
- Designed to be used in austere environments and requires little to no maintenance
- U.S. Patent No. 11,448,475 - Hand operated, mechanically advantaged, clipped ammunition loader

Past Performance

- Nov 2021, Fort Barfoot, ARNG, DPTMS, Brian Reekes, brian.k.reekes.nfg@army.mil
- Mar, Nov 2023 Fort Indiantown Gap, ARNG, DPTMS, John Symons, jsymons@pa.gov
- Apr 2023, Camp Grayling, ARNG, DPTMS, SGM Tim Arnold, tim.r.arnold.mil@army.mil
