

# UVL-B19

## UV and Blue Light Testing Meter

The device is used for test the lens of Anti-blue light transmittance and Anti-UV transmittance. It has histogram and number display model, intuitive and simple to read.

### Features

- 1.3 inch display screen, easy to see the readings;
- Very compact and light weight, only 153g;
- One button design, simple to operate;
- Automatic calibration after power on;
- Mini USB charging, easy and convenient to charge;

### Specifications:

- Display: 1.3" Screen
- Display resolution: 240x240
- Battery capacity: 400mAh
- Working time: 2 hours
- UV wavelength: 400nm
- Blue ray wavelength: 425nm
- Input voltage: 5V 1A
- Net weight: 0.34 Lb
- Dimensions (packing): 3 3/4" x 1 7/8" x 2 1/4"
