

Olio-Skim™

Great for Oil/Water Separators!

The Olio-Skim™ is a compact lightweight oil skimmer that floats at the oil/water interface, efficiently collecting free oil and water for delivery to the VGS (Vertical Gravity Separator). The Olio-Skim™ is best suited for food industry and industrial waste water where the effluent levels vary significantly and floating solids have been screened. The skimmer head is adjustable so that you can increase or decrease the amount of oil or water needed to be skimmed.

Application

Oil & Water

Specifications

Float Ball Diameter: 4"
Skimming Head Diameter: 2"
Total Floating Height: 6"
Total Skimmer Diameter: 13"
Weight: 10 lbs
Minimal Operational Water Depth: 6"
Hose Connection: 1/2" Male Barb
