2. Information Power Pump INPUT:
 - AC 220v-240v
 - 50/60Hz
 - OUTPUT: DC 24v
 - 1.2A

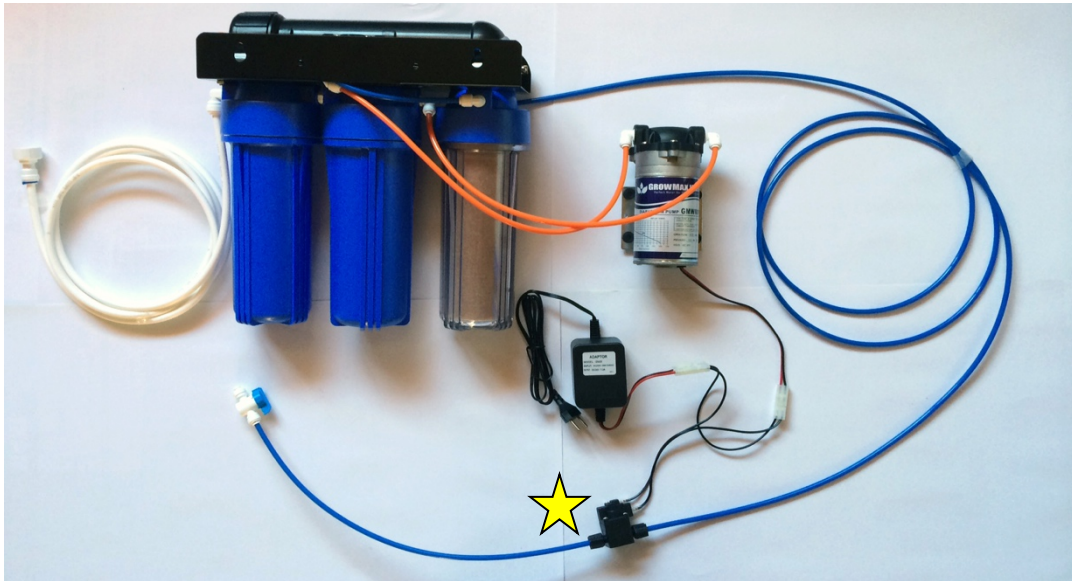

Recomendations:

Use teflon tape for the pump elbow connectors.

CONNECTION FROM THE BOMB TO THE POWER GROW 500

CONNECTION FROM THE BOMB TO THE MAXQUARIUM 000 PPM

MAXQUARIUM 000 PPM DETAIL

★ *Install Shut Off Switch only when we have the Float Valve Kit installed in the tank.

When the tank is full of water, the float valve will cause the system to stop producing water and the pressure switch will cut off the pump's electricity.

NOTE: the pumps are DC, so if we don't cut the power, it could burn.
