

With easy button controls, all that needs to be done is insert a 2cm hair weft into the 19mm ceramic coated curling chamber, then choose from the six temperature and time selection increments and finally select the curl direction – then press start and let the curler do all the work for you.

Model: AHC009

Cordless Automatic Hair Curler

Features

- The large LCD display will show personalised selection options including the 150°C-200°C temperature adjustment range and the 8-18 seconds time adjustment range as well as spinning left or right for the choice of inward or outward curls
- This curler uses PTC self-regulating heating and can produce slight curls, soft curls and strong curls
- At a total charging time of four hours and continuous run time of 50 minutes, the dual 3.7V 2000mAh lithium-ion rechargeable batteries power the curler and create fast and easy, yet beautiful and luxurious curls
