

Air treatment is heavily influenced by the extreme weather conditions of bushfires and floods. This Air Purifier with CADR 95m³/h will prevent interior risks of poor air quality with its sleek design, smart features and high-filtration performance.

Model: AP20

Air Purifier with CADR 95m³/h

Features

- Featuring a HEPA filter with activated carbon, this air purifier has a CADR, known as Clean Air Delivery Rate, of 95m³/h and an area coverage of 12m² for high level air purification
- With four fan speeds, you can choose from low, medium, high or sleep mode
- Enjoy a low noise level, 7 colour-changing lights, an adjustable standby mode night light and a filter replacement indicator
- You can also choose a set time of two, four or eight hours of purification time before the air purifier powers off
- The filter replacement indicator will illuminate on the touch screen and an increased operating noise coupled with decreased airflow will signal it is time to change out the size 16.2cm x 12.6cm HEPA filter
- This air purifier comes pre-packaged with one HEPA filter
