

Re-live the sensation of your favourite concert, dancing along with the stage lights and powerful bass, with our LED Stage Lights Bluetooth Speaker.

Model: BT9350

LED Stage Lights Bluetooth Speaker

Features

- Each woofer is 15.4cm in circumference and puts out 40 watts
- The flashing LEDs rotate between the colours red, blue, orange, pink, light blue, aqua and green – as well as displaying multiple flashing modes including pulse
- If the stage lights are a bit too much for you, you can simply switch them off
- Listen via Bluetooth, FM radio, aux-in, USB or TF card modes with or without the LED lights
- The microphone input makes karaoke very simple and fun
- Microphones can also be plugged in for speeches and announcements at your next ceremony, party or celebration
- The full functional remote can control the power, volume, bass, treble, LED flash mode, LED rotational mode, previous, next, play, pause, input mode, microphone volume adjustment and a quick-access mute button
- Enjoy a wide range of compatibility with your smartphone, tablet and other music devices
- Boasts an impressive 80 watts RMS sound and is lightweight at just over 7 kilograms at a height of 87 centimetres
