└────────────── OFF ──────────────┘
```

ADJUST VOLUME

While listening, press + VOLUME - to adjust volume.

ADJUST DISPLAY BRIGHTNESS

Press and hold DIMMER for 2 seconds repeatedly to select high or low brightness levels.

BATTERY BACK-UP

(For Temporary Time Storage Only)
Install 2 x LR06, AA or EU-3 battery (not included) according to polarity shown inside the battery compartment. In the event of a power interruption, your set will not work normally from the mains supply but there is now the advantage that your clock will continue to work. The clock display will not light up, as the clock time will be held in the memory. This also enables you to move the set from place to place without re-setting the clock every time. The battery back-up system is only meant to be used from short temporary power interruption. For longer durations, the battery may become exhausted or there may be some deviation in accuracy. When the battery is exhausted, it should be removed from the set to prevent leakage. If you do not wish to take advantage of the battery back-up system,

your set will work normally without a battery. However, if disconnected from the mains, the clock figures will flash when the mains are re-connected and you must re-set the clock as described in the Electronic Clock Operation paragraph. Attention should be drawn to the environmental aspects of battery disposal.

SPECIFICATION

Power Source	: 100-240V ~50/60Hz,
Tuner Range	: FM 87.5-108.0MHz
Power Consumption	: 5W
