

Heating your home can be as easy as roll, plug and set with our powerful 2000W Convector Heater

## **Model: H520**

## 2000W Convector Heater

## **Features**

This handy heater is not only portable and light, but it warms up a room quicker. Convector Heaters distribute heat evenly. Its also healthier to run and does not affect indoor air quality compared to tradtional heaters. With a build in adjustable thermostat, you can maintain your ideal temperature and steady flow of heat throughout the room.

Complete with a three heat setting, free standing with handles, overheating protection, and a adjustable thermostat, the 2000W Convector Heater is the perfect choice for homes and apartments.
