

Heating your garage, shed or verandah can be as easy as secure, plug and set with our powerful, 2000-watt free-standing outdoor heaters.

Model: H600

Free-Standing Outdoor Heater

Features

- With a simplistic pull chain to turn the heater on and off and an innovative quartz heating element, the heat generated will transfer the warmth directly onto anything nearby
- Equipped with a tip-over switch and sturdy base, this free-standing heater will safely keep a crowd warm at an adjustable stand height between 170 to 210 centimetres
- This heater can also be mounted onto a wall, with both free-standing and wall-mounted forms providing a 45° adjustable head angle
- Complete with an IPX4 water-resistant and splash-proof rating, the Free-Standing Outdoor Heater is the perfect choice for covered outdoor areas
