

The Digital Glass Kettle with Tea Infuser is fitted with 'boil dry' and overheating protection through an automatic switch off, to take the heat off those busy moments of multi-tasking.

Model: SK200

Digital Glass Kettle with Tea Infuser

Features

- This intelligent, digitally-powered cordless kettle offers 360-degree base rotation over a concealed, stainless steel heating element and is powered by the digital display panel on the microcrystalline glass touch-button base
- Its 1.2 litre capacity can fuel countless tea and coffee breaks, with five quick-start temperature control settings for reaching the perfect refreshment and utilising the automatic keep warm function for twelve hours
- The included tea infuser allows you to boil your favourite loose-leaf tea to your desired temperature, your way, every time
- Enjoy an adjustable power system between 50W – 800W, a keep warm mode between 15 minutes up to 12 hours, an adjustable temperature thermostat between 40°C-100°C for keep warm mode and a delay start option between 30 minutes up to 12 hours
