

Long term purified drinking water can positively adjust body functions, improve the immune system, prevent viscera calculus, clean the inside of blood vessels, stabilise metabolism and prevent dermatosis. It can also prevent mineral element shortage by drinking general tap water.

Model: WC250

Cold Water Dispenser

Features

- Dual-taps (room temperature or chilled water)
- 6-10°C cold water
- Cooling capacity 2L per hour
- Over-current protection
- Electric-shock protection
- Activated carbon and resin filtration system
- 85 watts of power
- High power compressor
- 20L bottle
- Filter that purifies tap water
- Power and cooler indicator lights
- Low noise, energy efficient
- Dual shelf storage space

Specifications

- **Features:** Dual-taps (room temperature or chilled water), fast cooling system, activated carbon and mineral filtration system, automatic thermostat, 6-10°C cold water, one water purifier bottle and one filter included, 85 watts of power, over-current protection, electric-shock protection, dual shelf storage space
- **Filter Capacity (per filter):** 3000L or 12 months (approximately)
- **Cooling Capacity:** 2 litres per hour
- **Water Purifier Bottle Capacity:** 20 litres
- **Filter Contents:** Activated carbon with silver ions, silex sands and mineralisation balls
- **Colour:** White/Gray
- **Measurements:** 26cm x 33cm x 101cm
- **Weight:** 12.9kgs
