## CATALOGUE

## SOFTFLAME

**SOFTFLAME** or also called regular flame is the most common of all known flame types. It is generated by a piezo or flint wheel ignition. The optimum height of a softflame is approx. 3cm.

## COLORFUL TURBOFLAME

**TURBOFLAME** The windproof burning behaviour is the mark of distinction of turbo flames. Above a nozzle the lighter gas is mixed with air, swirled inside the diffuser and ignited by an electrode. The mixture burns like a Bunsen burner with great heat, but without a visible flame. In general the same technique as used for the classic turbo flame. The only difference is the special magnesium wire that creates the interesting colorful flame.

## JETFLAME

**JETFLAME** is probably the hottest flame available at present. Due to the fact that gas and air are swirled above a nozzle through a special burner type, the sharp and pointed flame is created. And such JETFLAME is normally use for cigars or other professional ways.

To pass the **HEAT TEST** lighters have to withstand 4 hours in a special oven at 65°C. Thereby they may not get any splits or Leaks of gas.

The **DROP TEST** indicates the ability of the lighter to withstand safely a drop from 1.5 m in a group of concrete without splitting.

According to the outside temperature the **FLAME HEIGHT** of lighters varies in use. The maximum flame height may not exceed 10 cm.

The **ISO22702** is a world-wide valid Norm which states the demands within the general product safety for utility lighters. It consists basically on three test methods (**HEAT TEST, DROP TEST, FLAME HEIGHT**) that an utility lighter has to pass before being placed on the market. **ISO22702** certification can be provided upon request.

All **FLAMECLUB** packs carry the **ISO22702 Norm** required warning and safety pictograms clearly printed.

**FLAMECLUB** utility lighters are produced in **TÜV** monitored factories. All the production must pass stringent certified and integrated quality management.

# UTILITY MicroTorch

Dear Clients,

Thank you for looking the high quality Utility Burner by FLAMECLUB. It's a wise choice and one that will prove the test of time as a durable top quality product. To make sure you get optimum results and long-lasting service from our Utility Burner, we will provide some important information plus tips for optimal use and aftercare, as well as safety guidelines.

### Outstanding product features at a glance:

The Utility Burner from FLAMECLUB is a reliable and durable flame appliance for producing caramel from all types of sugar on desserts such as Crème Brûlée, Crema Catalana or even ice cream (which maintains its cold temperature under a sugar layer), as well as for vegetables or meat. The Utility Burner is ideal for browning meringues, topping off gratin and removing skin from tomatoes or peppers.

- > Adjustable gas dial for controlled application
- > Quick and professional use providing flame temperatures up to 1.300°C / 2.340°F.
- > TÜV approved safety features through safety switch (child resistant locking system).
- > Superior grade gas valve for regular and reliable refilling
- > Easy refilling with commonly available lighter gas
- > Long use with large capacity reservoir of 42ml / 1.4oz. (Propane/Butane) providing approx.60 to 70 minutes flame duration.
- > Flexible application hand held or positioned firmly on its stand base.

Flameclub designs and manufactures a complete selection of exclusively designed lighter products for any lifestyle.

Flameclub offers lighters for the gift, housewares, outdoor, promotional, and tobacco markets.

Flameclub takes pride in providing excellent customer service and absolutely high quality on all our products.

Flameclub invites you to Enjoy Your Best Lighter!

## SOFTFLAME

**SOFTFLAME** or also called regular flame is the most common of all known flame types. It is generated by a piezo or flint wheel ignition. The optimum height of a softflame is approx. 3cm.

## COLORFUL TURBOFLAME

**TURBOFLAME** The windproof burning behaviour is the mark of distinction of turbo flames. Above a nozzle the lighter gas is mixed with air, swirled inside the diffuser and ignited by an electrode. The mixture burns like a Bunsen burner with great heat, but without a visible flame. In general the same technique as used for the classic turbo flame. The only difference is the special magnesium wire that creates the interesting colorful flame.

## JETFLAME

**JETFLAME** is probably the hottest flame available at present. Due to the fact that gas and air are swirled above a nozzle through a special burner type, the sharp and pointed flame is created. And such JETFLAME is normally use for cigars or other professional ways.

To pass the **HEAT TEST** lighters have to withstand 4 hours in a special oven at 65°C. Thereby they may not get any splits or Leaks of gas.

The **DROP TEST** indicates the ability of the lighter to withstand safely a drop from 1.5 m in a group of concrete without splitting.

According to the outside temperature the **FLAME HEIGHT** of lighters varies in use. The maximum flame height may not exceed 10 cm.

A special patented friction wheel allows a child resistant ignition with flint lighters for protecting the safety of user.

**FLAMECLUB** Lighters are produced in TÜV monitored factories. All the production must pass stringent certified and integrated quality management.

A higher pressure on the push button ensures a child-resistant ignition with electronic lighters for protecting the safety of user.

# GAS REFILL MANUFACTURER

## HERSTELLER VON NACHFÜLLGAS

Flameclub is part of a worldwide Flameclub network with its main activities involving manufacturing and distribution of cigarette lighters, smoker's accessories, utility / kitchen lighters and professional burners. Expanding our activities with the production of a fully automatic line of gas refill cans with various capacities, has enabled us to offer our customers a full service assortment for our products.

Offering a wide range of aluminium and steel cans in various capacities and the usage of a high quality gas mixture including isobutane, we can supply our customers with high quality gas refill products for a wide variety of use.

As our range offers also camping gas refill products, we are also offering accessory products for our camping gas line.

Flameclub ist Teil des weltweiten Flameclub Netzwerks mit seinen Hauptaktivitäten in der Herstellung und dem Vertrieb von Feuerzeugen, Raucher-Accessoires, Utility-/Küchen- Feuerzeugen und professionellen Brennern. Die Erweiterung unserer Aktivitäten mit der Produktion einer vollautomatischen Linie von Gas-Nachfülldosen mit verschiedenen Kapazitäten, ermöglicht es uns, unseren Kunden ein Full-Service-Sortiment für unsere Produkte anzubieten.

Mit einer breiten Palette von Aluminium- und Weißblechdosen in verschiedenen Kapazitäten und der Verwendung eines hochwertigen Gasgemisch einschließlich Isobutan, können wir unseren Kunden mit Qualitäts-Nachfüllgas mit einer Fülle an Einsatzmöglichkeiten liefern.

Da wir in unserem Sortiment auch Nachfüllprodukte für Camping-Gas führen, bieten wir darüberhinaus auch noch Zubehör-Produkte für unsere Camping-Gas-Linie.
