

CIRCLE & LINE

ABOUT

Circle & Line is a woman-owned design and fabrication studio located in Austin, Texas. We produce distinctive wall hangings and mobiles. Each piece is crafted by hand in our studio to ensure a product that is made to last. We've built strong relationships with local suppliers to responsibly source quality materials. Our small, dedicated team is passionate about making things that add beauty and meaning to everyday life.

CORIE HUMBLE

Corie Humble is Circle & Line's founder and designer. A background in painting and patternmaking influences her approach to design, regardless of material. With a process rooted in traditional craft and art history, Corie pares each design down to its most essential elements. Her careful approach creates a personal, meaningful connection that accompanies each object into its new home.

THE QUARRY COLLECTION

The Quarry Wall Hangings were inspired by the smooth, worn edges of river rocks. Each piece is heat-formed and shaped by hand to add dimension to the organic shapes.

THE RIPPLE

The Ripple Wall Hangings are hand-formed, creating a soft, undulating, three-dimensional form that feels as if it were floating off the wall. The set should be hung intuitively to fit the space and each other.

ANNEALED BRASS

The colorful wabi sabi surface of the annealed brass comes from heating the brass at high temperatures. Annealing softens brass so it can be shaped. The silver and pink colors are copper and zinc, which are pulled to the surface by the heat, while underneath the yellow brass remains. The unique variance of the surface makes each piece truly one of a kind.

THE BALANCE COLLECTION

The pieces in The Balance Collection are inspired by the idea that two things can simultaneously be opposites and complementary. The striking black patina and polished brass, both hand-finished, create visual harmony within a balanced composition.

THE FOLD COLLECTION

The Fold Collection is a modern exploration of circles and folds inspired by Bauhaus design principles of simplicity, minimalism, and geometrical form. The pieces are powder-coated and can be installed indoors or outdoors, solo or in a group.

BLACK PATINA

Our black patina finish has a velvety, tactile quality like natural black leather. It is created by the natural chemical reaction that occurs after hand-dipping brass into a darkening solution. Each component is then methodically buffed and coated with a matte lacquer to achieve a satisfying and lasting finish. Individual variation in each piece adds depth and dimension to accentuate their unique handcrafted nature.

POLISHED BRASS

A nod to mid-century design and nautical hardware, the golden glow of polished brass brightens the space it occupies. Each piece is sanded, buffed, and polished by hand before being coated with a protective lacquer. With a living finish that naturally patinas over time, beautiful variation is to be expected—and admired.

BLUE PATINA

The Blue Patina Collection is inspired by the interaction of light and water. We paint every piece individually by hand, making each one unique, like a watercolor painting. The combination of vibrant patina, blue matte powder coating, and luminous polished brass creates a sense of harmony and wonder within each design, animating its environment.

MONOCHROMATIC GREEN

Bringing to mind the green shades of nature, or favorite houseplants, the durable matte finish and powder coating of our monochromatic green hues provide contrast to their accompanying polished brass parts. The carefully selected colors create a sense of playfulness and enliven any room.
