

Trail Gear Oasis Tent Instructions (Same for all Versions)

Step One:

Remove tent spikes and tent poles from the bag.

Step Two:

Unroll cover behind vehicle. Insert tent poles in pocket of cover and secure front of tent to ground spikes or sandbags. (It is best to position vehicle where wind is blowing directly into the tent area. If this can not be achieved then point orange cord and spikes or sandbags in the direction that wind is blowing to secure the tent from wind pushing on the tent pole.)

Step Four:

Insert ground spikes or sandbags at each strap point provided on the tent. (If using sandbags, insert a tent pole into a sleeve attached to the sandbag to secure the tent poles in an arched position.)

Step Five:

Secure Velcro at rear of tent area just above seat belt attachment.

Step Six:

Enjoy!

Thank You For Choosing Trail Gear Oasis!!
