Beginners typically dose between 300-500mg per week, intermediates stay around 500mg per week and for advanced users, the typical dose ranges between 600-800mg per week Injection de Deca Durabolin en ligne en France.

Fiction: 2-300 mg/week of Deca is a small dosage. Fact: 300 mg - 400 mg/week of Deca is the most anyone should ever need and going beyond that is a system of diminishing returns. Great gains can be made on 200-300 mg/week! Fiction: Deca will make you retain a ton of water.

Whatever the case may be Deca 300 may be a big part of the total answer. Deca 300 is an anabolic androgenic steroid of the 19-nor anabolic steroid family. While it is one of many anabolic androgenic steroids Deca 300 is perfect for adding quality mass and by quality we mean solid lean muscle tissue. If you care a hoot about pins, you can divide this into two injections for the week. For a cutting cycle, even 250-300mg/week of Deca is fine. You will gain quality muscle tissue without the risk of gaining too much water during the cycle.

Due to the steroid's long half-life one injection per week could get the job done. However, most will find two small equal size injections per week that total the desired weekly dose to be most efficient. This will cut down the total injection volume.
