

Optimyst Inset

INSET ELECTRIC FIRE

RTOPI20BR

Optimyst Inset Brass

This inset electric fire features a traditional brass effect finish, and is suitable for many rooms including the lounge, dining room and conservatory.

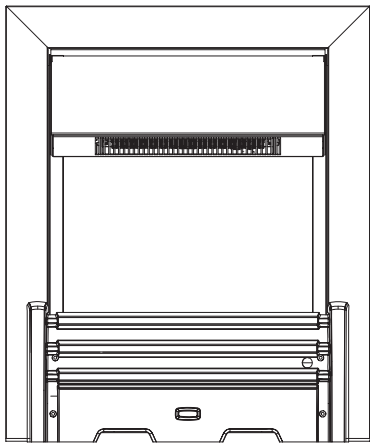

This electric fire features a Optimyst 3D flame effect, which can be used with or without heat and adds an inviting, warming glow to any room. This fire can be operated either manually or via the remote control.

Optimyst uses ultrasonic technology to create the world's most realistic flame effect, with an ultra-fine water mist that mimics flame and smoke. As the mist rises through the logs, warm light is emitted which reflects against the water, creating an incredibly realistic 3D illusion of flames and smoke which is commonly mistaken for the real thing.

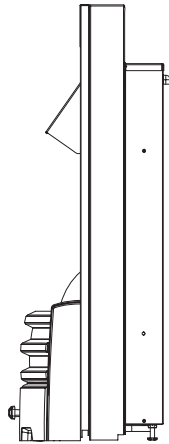

A visual focal point for any space the Optimyst inset brass is an incredible fire filled with features you will love.
