Tren Acetate 150 Malay Tiger - Cut Mix 150 mg Cut Mix 150 contains 3 different active substances:
Testosterone Propionate - 50 mg, Drostanolone Propionate - 50 mg, Trenbolone Acetate - 50 mg.
#imagedescription : side by side comparison photos of Logan, a white trans man. On the left, it is
labeled pre-T in white text and Logan has a more slender face with feminine features and slightly longer
brown hair. He isn't smiling. On the right, it is labeled 15 months and Logan has a fuller, much more
masculine face with shorter brown hair and light facial hair. He is smiling. The actual content should be
150mg of Trenbolone Acetate, and the content was 146.8mg of Hormone. This means that whilst it is
indeed under the stated dosage, it is marginal. Certainly, based on this test, Malay Tiger Tren Ace, we
would recommend! Also worth noting that the BA ratio was rather high, but yet a very low BB ratio.
