

SURGICAL GRADE 316L STAINLESS STEEL CROWNS

**BETTER
QUALITY AT
A LOWER PRICE.**

NuSmile[®] **SSC**
PRE-CONTOURED

Tested. Trusted. **True.**

37% HIGHER MICROHARDNESS THAN 3M SSCs.

NuSmile SSCs are made from the same 316L surgical grade steel that is used in high-stress applications like orthopedic implants and have higher microhardness to resist occlusal wear through.

NuSmile SSCs are made from 316L surgical grade stainless steel.

VS.

Conventional SSCs are made from food grade steel.

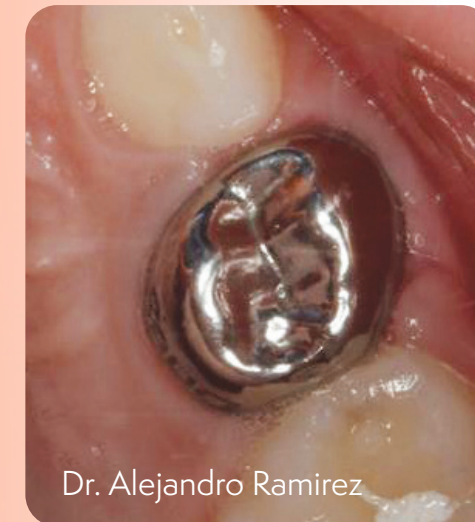

NEW!

Validated sterilization instructions are also provided to meet the high standards of hospitals. See inside back cover for more information.

100% of pediatric dentist evaluators rate "Quality of Fit" superior to their current brand.

NuSmile SSCs routinely provide a great fit without additional crimping or trimming required, saving valuable chair time.

More value at less cost

NuSmile SSCs are designed to provide higher performance for the patient while reducing costs for the clinician.

BETTER VALUE FOR

There is a **WEALTH OF VALUE** packed into **NuSmile Pre-Contoured SSCs**.

BETTER PRODUCTIVITY

Same surgical grade 316L stainless steel used in high-stress orthopedic implants which is biocompatible, corrosion resistant and highly polished.

Optimized contour and shorter height helps reduce chair time and improves practice productivity.

Laser-etching is indelible and easy to read. Stands up to autoclaving and helps eliminate errors.

37% higher microhardness value resists occlusal wear through exhibited with other brands.

Broader occlusal table, better defined cuspal anatomy provides more functional mastication.

Routinely better quality of fit NuSmile SSCs are strong, easy to trim and crimp if needed.

“I switched to NuSmile SSCs from a leading competitor because of their higher quality surgical grade steel, which adapts better at the margins.”

Dental Specialists*

THE ONLY STAINLESS STEEL CROWNS WITH VALIDATED STERILIZATION INSTRUCTIONS.

Hospitals and Surgical Centers sometimes discard tried-in, but not cemented, stainless steel crowns - **No longer**. NuSmile provides validated sterilization instructions that meet hospital standards.

View and print IFU with sterilization information

DO NOT REUSE

NuSmile Crowns can be cleaned and sterilized if contamination occurs, however, crowns cemented for intraoral service should not be cleaned and sterilized to use for another patient.

*All prices are for 1st Primary Molars Size 4. All prices are accurate as of August 2019.

BETTER THAN EVER

TESTED:

- Made with 316L surgical grade stainless steel to resist wear through
- Ideal temper for easier trimming and contouring if needed
- Biocompatible and highly polished to reduce plaque build-up
- Functional, accurate anatomy
- Laser-etching reduces errors and saves time

TRUSTED:

- Validated instructions for when sterilization is needed
- Less trimming or crimping compared to other brands
- Saves time and improves productivity

TRUE:

- Quality of fit, price and value that is simply better
- Durability and ease of use dentists depend on
