

TECHNICAL DATA SHEET

PTFE

Dry lubricant with PTFE

PTFE is a dry, clear film lubricant which can be applied to surfaces where a smooth yet durable finish is required.

PTFE is ideal for use where surfaces come into contact with paper, packaging or textiles. It is also suitable as a dry lubricant for use where conventional oils and greases attract dust.

PTFE may be used in high-tech manufacturing applications with confidence.

PTFE will repel moisture and resist most acids and alkalis.

The lubricant will withstand extreme pressure and combat wear.

Physical and Chemical Properties

Appearance – Aerosol

Odour – Organic solvents

Flash Point - < -40°C

Auto Ignition Temperature 410 – 580°C

Flammability Limit – Lower 1.8% Upper 9.5%

Information given concerns the major ingredients

Directions

1. Shake can well
2. Spray into/onto area to be lubricated.
3. Spray in short bursts for maximum efficiency.

Product availability

500ml aerosol
