

Wizard's BetterView screen features many of the key benefits of our other screens all in one package. BetterView utilizes superior-quality aluminum and UV-resistant fiberglass mesh which endure the test of time and harsh climates. Built and priced for every single and double door application up to six feet wide and eight feet tall.

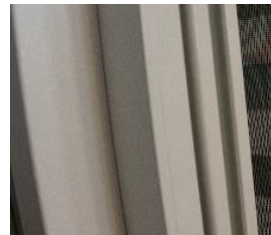

Discrete Design

BetterView utilizes a sleek square housing with a slim 2 1/2" profile allowing it to fit harmoniously into any architectural setting.

Captured Mesh

No more blowouts or frayed mesh! Utilizing specialized equipment, the screen mesh is captured on all four sides, including both tracks. This keeps the mesh retained and tight at all times.

Latching Slide Bar

A full-length latching slide bar provides discreet "one touch" operation of the screen without the use of magnets, pullies, or cables.

Speed Reducer

Speed reducing glide technology with its "self closing" slow recoil viscous braking system, provides consistent operation from start to finish.

	Width	Height
Sizes Up To:	6'	8'

Benefits:

Compact Design

Clear Vision

Insect Control

Custom Build

Warranty

BetterView is covered by a limited life-time warranty.
