

PHOENIX

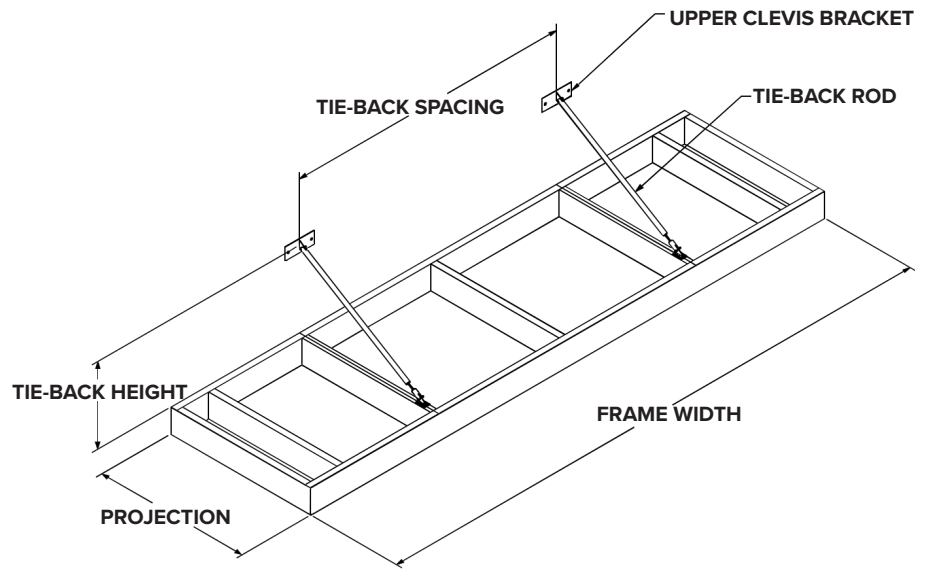

CANOPY SYSTEM

The Phoenix Trellis is our beautifully designed open frame canopy system that provides sun and rain protection with optional in-fill panels. This trellis gives any building an ultra-modern look. With a powder coated finish and all aluminum construction, there are many ways to configure this product. The Phoenix Trellis system is easy to install and can be field fitted if necessary. Phoenix systems are available with an 8", 10" and 12" flat or open channel face.
