

# Three functions. One tap.

Instanti brings the affordable luxury of boiling water taps into every modern home. Dispensing instant 98 °C water, along with a standard hot and cold mixer. **It's a 3-in-1 solution that completely transforms the usability of kitchen interiors.**

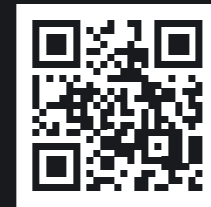

## Excellence in engineering.

Made to the highest standard of quality, all Instanti taps are hand tested to deliver the very best experience. We're so confident in the reliability and durability of our boiling water taps that each range is backed by our 2 year warranty.

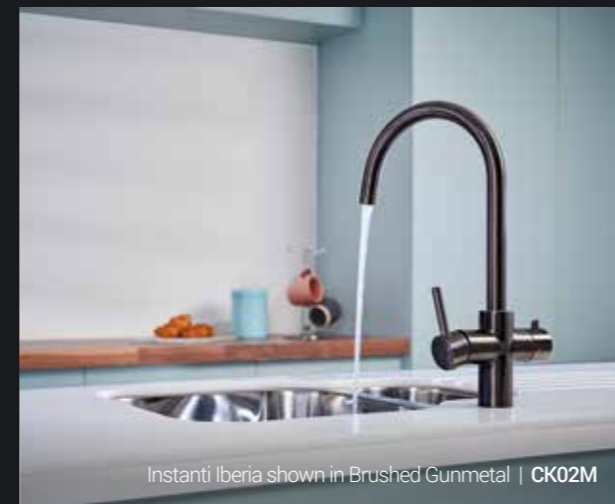

## Safety on tap.

We put safety first in every design. Instanti taps are double-spring loaded with a twist and hold security mechanism, which automatically self-rights once your hand is removed from the handle. Its insulated spout also remains cool to the touch when in operation – ideal for homes with young children.

## Ignite

This boiling water tap is ideal for traditionally styled kitchens with its ceramic Victorian handles. Timelessly elegant and wonderfully practical.

Instanti Ignite shown in Brushed Gold | TK01G

## Idaho

A design based in the beauty of simplicity, the Idaho is an entry-level boiling water tap that makes this modern home luxury accessible to everyone.

## Iberia

The Iberia sports a classic curved spout that makes it at home in any kitchen interior style. A versatile and understated option for all types of property.

## Idris

Creating a more solid look, the Idris sports a square base design, with a sleek, modern spout to blend into a range of kitchen styles.

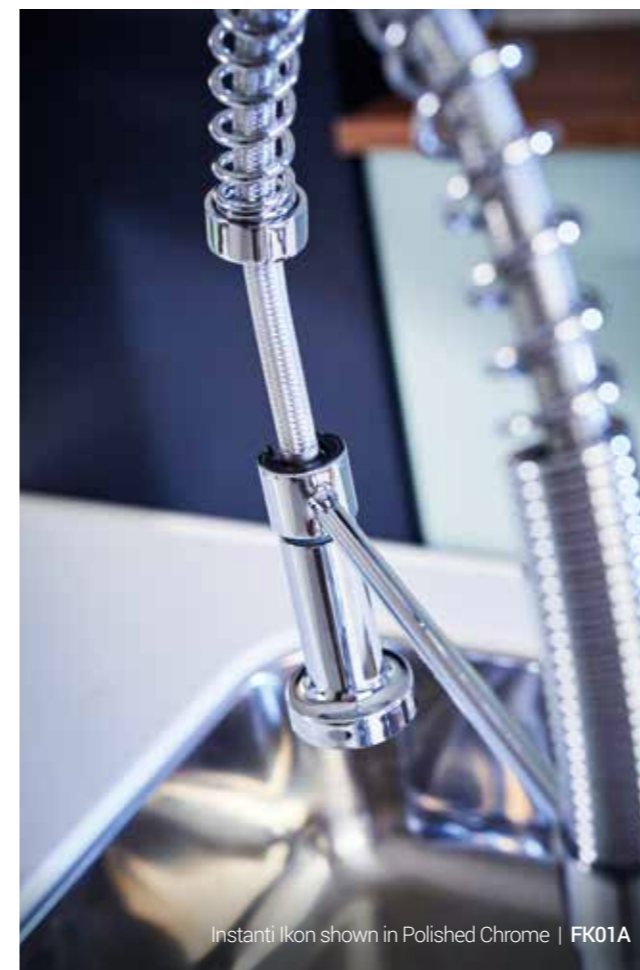

## Ilyas

The square base of the Ilyas combined with its classically curved spout give it a powerful and timeless aesthetic perfect for modern homes.

## Ikon

Slender, sophisticated and convenient, the Ikon blends a flexible tap head with an independent 360° swivelling boiling waterspout for easy use.

# Innovation. Ingenuity.

## Carbon Purity Filter

The Instanti Carbon Purity Filter works hard to remove mineral deposits and dirt particles from water to provide an extra refreshing taste. As it also substantially reduces the effects of limescale build-up on the tank, regular replacement of the filter every 3-6 months is essential to maintaining our 2-year warranty.

### Quick & Simple to Replace

- Replaces in seconds
- No tools required
- Express delivery available
- Maintains product warranty

## Installation

Isolate and remove existing tap. Install and connect new tri-flow tap, connect hoses from tap to tank (cold tap to tank supply via filter). Prime the tank and check water connections (as per supplied instructions) then plug in the tank. A carbon filter along with all fittings and fixtures needed will be supplied.

Use the QR code to the right to view our handy installation video.

## The Instanti Boiler

Discreetly hidden beneath the sink, the Instanti boiler reliably delivers piping hot water, cup after cup. This unvented tank is not under mains pressure so no excess water is discharged to drain. It comes with overheat and float sensors built-in to protect the boiler and is fully insulated to improve efficiency.

### Features

- 2.4 litre tank (approx. 10 cups)
- Energy-efficient insulated tank
- 1 x carbon rod filter supplied
- 315 x 210 x 210mm (HxWxD)
