

FIFTH WHEEL & GOOSENECK

LEADING SUPPLIER FOR THE LEISURE MARKET

Hayman Reese has over sixty years of experience in towing. We are also the leading Fifth Wheel and Gooseneck supplier for the leisure market. Our Fifth Wheel and Gooseneck products are supplied as kits, comprising of a custom designed rail kit with chassis brackets, along with your choice of hitch system and a Hayman Reese SmartClick™ wiring solution.

Included with our custom kits are all the compliance plates required to ensure compliance with State legislation. We also have Universal kits for vehicles not supported by our custom kits.

You can relax, safe in the knowledge that once fitted, your vehicle will meet all the requirements of the Australian regulations and will pass any tests and compliance checks which may be required by certain States and Territories. All our products are fully tested to ensure compliance with ADR62/02.

WHY HAYMAN REESE WIRING

Introducing the smarter way to connect trailer wiring systems – SmartClick™ by Hayman Reese.

As vehicle computer and electronics systems become more sophisticated, connecting aftermarket add-on's such as fifth wheel and gooseneck wiring tails, brake controllers and power harnesses is becoming increasingly difficult.

Hayman Reese's SmartClick™ wiring is a revolutionary system that makes use of existing connection points to connect aftermarket wiring applications. No longer do you need to locate, scotch-lock or solder wires and risk interfering with or damaging existing systems.

With SmartClick™ wiring simply plug... and play!

FIFTH WHEEL & GOOSENECK

THE DEPENDABLE CHOICE

RAIL KITS

Hayman Reese custom rail kits have been designed specifically for each vehicle. They transfer the towing forces and loads to the vehicle chassis in a way which will ensure that the safety and quality of your vehicle is not compromised.

Hayman Reese rails and chassis brackets use a high quality eCoat and Powder Coat finish coating called Metalshield, to ensure protection against corrosion, backed by the Hayman Reese limited lifetime warranty.

FIFTH WHEEL HITCH SOLUTIONS

Hayman Reese has a selection of hitches available. The selection of the hitch comes down to user requirements and preference, and the tow rating required - right up to 7000kg ATM.

THE EURO HITCH

R16 TITAN

R20 TITAN

30K

GOOSENECK SOLUTIONS

ABOVE BED

Above-Bed Gooseneck Hitches mount to the same rails as most Fifth Wheel Hitches. This type of Gooseneck Hitch can be easily removed and installed as needed, leaving the mounting rails sitting in the tub.

STANDARD GOOSENECK PLATE

DUAL POSITION GOOSE PLATE (PROVIDES ADDITIONAL CLEARANCE)

HIDE A GOOSE

Hide A Goose, also known as Under-Bed Gooseneck Hitches, are available as either a custom fit to your specific vehicle or a universal fit. They have adjustable height brackets to suit varying tray heights, which attach under the bed of the pickup to support the gooseneck head. The 3" ball can be removed when not in use.
