

WHY INSTALL A BATTERY MONITOR?

As required by law in Australia, Brake Away systems must be fitted to all caravans and trailers with a gross vehicle mass of over two tonnes. In some Australian states such as NSW, it is also law to install a battery monitor unit to ensure the battery on the Brake Away system is sufficiently charged, reducing the risk the system will fail.

When fitted to batteries that power appliances (such as fridges or freezers), SmartCheck™ will ensure the power source never unknowingly fails.

WIRELESS BATTERY MONITOR

THE DEPENDABLE CHOICE

Available from:

PUT YOUR FAITH IN THE TOWING EXPERTS

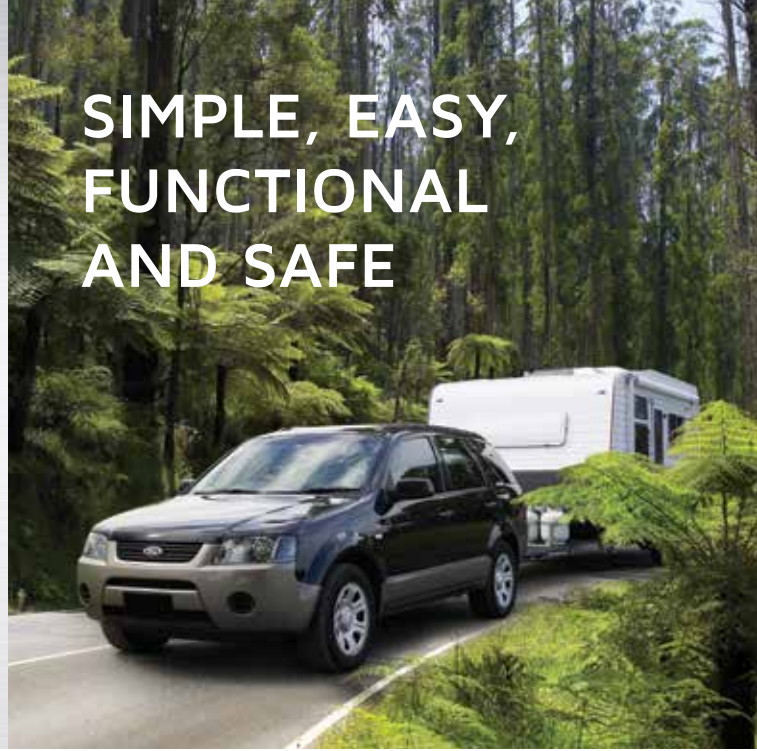

MONITOR UP TO FOUR BATTERIES AT ONCE WIRELESSLY

Hayman Reese SmartCheck™ Battery Monitor is the first battery monitor capable of monitoring the charge of up to four batteries located in either the vehicle, caravan or trailer at the one time via wireless link.

Each Battery Monitor Unit connects to the Display Unit via a wireless link, making installation straight forward regardless of the battery location.

While the primary purpose of the system is to monitor the battery status of the caravan or trailer's Break Away unit, other batteries can be added by connecting additional Battery Monitor Units to each battery.

SIMPLE, EASY, FUNCTIONAL AND SAFE

KEY FEATURES:

- 1 Ability to connect up to four Battery Monitor Units simultaneously. The Display Unit will remember paired devices and automatically re-connect on future journeys.
- 2 Wireless connection between Battery Monitor Units and Display Unit.
- 3 No hard wiring of Display Unit to Vehicle.
- 4 Ability to quickly re-configure connections if the battery set-up has changed; such as when a different trailer is being towed.
- 5 Audible warnings if the voltage of a battery drops to an unsafe level.
- 6 Displays the status of the wireless connection between the Display Unit and the Battery Monitor Units.
- 7 Dashboard or Accessory Socket mounting options for the Display Unit.
- 8 Stylish looking design.
- 9 Compatibility with future Hayman Reese products.
