PONDMASTER®   ProLine   Supreme AQUARIUM   Supreme HYDRO   POOL CARE   DANNER MANUFACTURING, INC. est. 1934

A HISTORY OF EXCELLENCE.

IMPROVING THE ART OF FLUID MOTION™ FOR ALMOST 90 YEARS.

Ever since our modest beginnings, Danner Manufacturing, a family owned and operated business, has developed and produced innovative products for hobbyists and professionals alike.

Eugene Danner Sr. started planting the seeds for Danner Manufacturing in 1934 while working in the cellar of his home on Seneca Avenue in the Ridgewood district of Brooklyn, New York. While holding a full-time job as a factory manager, Eugene found great pride creating the Danner business on his time off from his regular full-time job duties. Eugene's first product was a small waterfall toy, which was used as a component in a toy sold by the world famous F•A•O Schwarz® toy store in New York City. Eugene Danner Sr. along with his children, Eugene and Renate, would travel from Brooklyn to Canal Street in Manhattan where they would purchase scrap metal for these waterfall toys.

Eugene Danner Sr. Summerfield St. Brooklyn, NY Factory. Circa 1968

Around that time, the aquatics hobby began to grow and people who kept fish as pets were known as "Fish Fanciers." Eugene was often asked if he could make water and air pumps for this new-found hobby. From there, the "Supreme Aquarium" brand was born and the original Supreme Dynamaster® Air Pumps were introduced, which quickly became the standard to which others aspired.

At the end of World War II, Eugene's son came home from active duty and opened the first official Danner Manufacturing factory on Woodbine Street in Brooklyn. He took on his father's growing hobby as a full time business. At this time, Eugene Danner Sr. quit his job as a factory manager and started working full-time with his son to formulate what is now known as Danner Manufacturing. As the years progressed, Eugene and his son upgraded and opened up a new state-of-the-art factory in 1960 on Summerfield Street in Brooklyn.

In the 1960's, all three of Eugene Danner Sr's grandchildren started helping in the factory and in 1974 the Danner family moved its operations to a new facility in Islandia, NY. In 1987, Eugene passed the torch onto his son, Michael who ran the business until 2005. During this time, Michael's sister, Catherine Danner designed and developed many award-winning package designs throughout the 1980's. Their sister, Rosemarie is the current CEO of Danner Manufacturing and continues to carry on the great Danner legacy and tradition.

Almost 90 years later, continuing with Eugene Danner Sr's vision, Danner Manufacturing still employs and manufactures within the United States. Our sophisticated and energy-efficient magnetically driven and hybrid pumps continue to be popular products with thousands of satisfied and loyal customers all over North America.

The brands which we manufacture and market are: Supreme Aquarium, Pondmaster, ProLine, Supreme Hydro, Pool-Care, Pondmaster ECO and the Danner Home Collection. These brands can be found in the Aquarium, Water Gardening, Pond, Pool & Spa, Hydroponic, Home and OEM industries throughout North America and the offshore markets. We are committed to providing our customers with high quality and reasonably priced products, creating the best value.

PONDMASTER ULTRAVIOLET CLARIFIERS

PONDMASTER ULTRAVIOLET CLARIFIERS are an enviornmently-friendly way of safely controlling free-swimming "suspended" algae without the use of any chemicals or water treatments. "Suspended" pond algae causes your pond water to become green and cloudy. Pondmaster Ultraviolet Clarifiers help maintain crystal clear water in your pond by passing it in a spiral motion across the UV Lamp mounted inside the housing, greatly reducing the algae levels in your pond.

CAN BE USED EITHER FULLY SUBMERGED OR OUT OF THE WATER AND FEATURE A GLOWING MONITOR HALO RING THAT SHOWS THE CLARIFIER IS WORKING. The soft blue Halo is visible during the day or at night from any angle, but does not detract from the beauty of your pond. Pondmaster Ultraviolet Clarifiers are designed to handle the clarifying needs of ponds up to 6,000 gallons.

FEATURES
- Vortex Flow Design Exposes Water Longer to Ultraviolet Light
- Fully Submersible
- Includes Transformer and 18' Grounded Power Cord
- Black Color is Unobtrusive Whether Used In or Out of the Water
- Includes ¾", 1", 1 ½" Stepped Barbed Fittings

The unique vortex flow design of the Ultraviolet Clarifier increases water contact time with the ultraviolet light, while the slim diameter lamp allows the water to get closer to the intense UV rays.

ONE OF THE SIMPLEST AND SAFEST WAYS TO KEEP YOUR POND WATER CLEAN AND CLEAR IS TO INSTALL A UV CLARIFIER

PONDMASTER FILTRATION SYSTEMS

PONDMASTER®

THESE INNOVATIVE LOW PROFILE FILTERS are designed to be unobtrusive in the bottom of the pond and its large surface area means less frequent cleaning. More than one filter can be connected to a pump using a tee fitting and offer mechanical, chemical and biological filtration. Dual filter elements offer particle filtering and chemical filtration of certain harmful compounds. **THE FILTER MEDIA IS EASILY RINSED OR CHANGED AND LESS TIME CONSUMING THAN MANY SIMILAR FILTERS OF ITS KIND.**

PROLINE PRO5000 SKIMMER

PROLINE SKIMMERS have been designed to promote healthy pond life by capturing floating organic debris such as leaves, plants, flowers, grass and twigs into the skimmer basket before they can settle to the pond bottom, which will eventually create a layer of sludge. If left unattended, this will begin decaying and start to produce ammonia. Ammonia buildup can become highly toxic to delicate fish and aquatic life.

FEATURES
- Strong Ribbed Cylindrical Housing Eliminates Cave-Ins
- Made from Heavy Duty High Density Polyethylene
- Ribs Anchor the Skimmer Solidly in Place, No Shifting or Heaving
- Tall 7" x 11" Wide Door for Efficient Skimming Over a Wide Range of Water Levels
- Install 2 Pumps in the Same Skimmer for Massive Flows and Maximum Efficiency
- Large Capacity Clog Resistant Leaf Basket that Keeps Debris Away from the Pump
- Accommodates Most Pumps Up to 8,000 GPH
- Versatile Bulkhead Placement Allows Multiple Inlets and Fittings Up to 2"

- Skimmer Lid Supports 300 lbs.
- For Maximum Cleaning, Use with Clearguard or ProLine Pressurized Filter Systems.
- Includes 1 ½" Barbed, 2" Slip and Bulkhead fitting
- Packed Individually

WITH DEBRIS PAD
- Quickly Removes Fine Particulates Such as Floating Dust and Pollen which helps polish pond water
- Provides Ideal Medium for Biological Filtration
- Bypass Slotting Ensures Water Flow to Protect Pump Even When Pad Needs Cleaning
- Easily Cleaned and Inexpensive to Replace

SUPREME® SKILTER™ PROTEIN SKIMMERS
FOR SALTWATER AQUARIUMS

PATENTED SUPREME SKILTER™ IS A UNIQUE COMBINATION OF A PROTEIN SKIMMER AND AN AERATING POWER FILTER FOR USE IN SALTWATER AQUARIUMS.

The venturi enables air to be injected into the water creating millions of very fine bubbles. Potentially dangerous protein compounds and toxins adhere to the bubbles creating a froth. This frothy waste pushes its way up into the collection tray where it can be harmlessly disposed of.

It features a large filter box, which can accommodate supplemental filter media in conjunction with the unique Bio-Matrix filter cartridge. It's state-of-the-art, energy-efficient motor uses a single moving part to operate. Manufactured from heavy duty plastic, the Skilter will give years of trouble-free operation, even in the adverse conditions which are common to saltwater aquariums.

SKILTER 250 • ITEM# 01031

Skilter 250 is recommended for aquariums between 10-55 gallons and can be used as a supplemental filter on larger aquariums. The protein skimmer will operate effectively on aquariums up to 125 gallons. The Skilter 250 has a flow rate up to 250 gallons per hour and includes a dual-media Bio-Matrix filter cartridge. Packed 6 Per Master Carton.

PATENTED COMBO: PROTEIN SKIMMER AND AERATING POWER FILTER

SKILTER 400 • ITEM# 01033

Skilter 400 is recommended for aquariums between 30-100 gallons and can be used as a supplemental filter on larger aquariums. The protein skimmer will operate effectively on aquariums up to 125 gallons. The Skilter 400 has a flow rate up to 400 gallons per hour and includes two dual-media Bio-Matrix filter cartridges. Packed 6 Per Master Carton.

SUPREME® OVATION
SUBMERSIBLE POWER JET FILTERS
FOR AQUARIUMS AND TERRARIUMS

Supreme AQUARIUM

OVATION FILTERS have been designed for hobbyists looking for powerful, quiet and effective filtration for their home aquariums and terrariums. They can be used for installations from 10 to 80 gallons if used singly, or larger installations if more than one pump is employed. They offer the right combination of mechanical, biological and chemical filtration to assure a clean habitat for aquatic pets.

Ovation Series filters include an adjustable spray bar, airflow regulator and two filtration elements (a sponge and a carbon filter). Units can be mounted vertically, or for terrariums, in a low-profile horizontal position using the included suction cups.

CAN BE MOUNTED VERTICALLY FOR SHALLOW HABITATS. GREAT FOR TERRARIUMS

FEATURES

• Innovative Design Filters up to 265 GPH
• Dual Filter Elements Provide Excellent Filtration
• Adjustable Air Regulator Allows Aeration Flow Control
• Includes Spray Bar for Enhanced Aeration
• Mounts Easily for Submersed use in any Terrarium or Aquarium
• Can be Operated in any Position, Horizontal or Vertical

In determining the correct size of Air Pump for your Aquarium, the simple rule of thumb would be 0.03 L/min (Liters Per Minute) of air flow for each gallon of water in your Aquarium. This is only an estimate. Your actual volume may need to be higher based on your fish & plant load.
