

Radiofrequency Treatment Consent

I understand that there may be side effects of RF and lipo-cavitation treatments that include:

- Redness that can last ten to thirty minutes or longer.
- Tenderness and bruising can last up to a few days.
- Uncommon side effects include small skin burn; temporary swelling and rarely small dimpled scarring.

There may be risks not yet known at this time RF and lipo-cavitation treatments cannot stop the formation of new cellulite or prevent future skin aging. Results are very individual. While it is expected to have a 40% to 50% improvement in the treated area after a completed series of weekly treatments, it is impossible to guarantee results. Some people exceed our expectations and some people respond below expectations. Weekly treatments present the best outcome in most individuals.

Results for facial treatments should start to be apparent by the third or fourth treatment. Body treatments may take longer to show improvement. There are other options for treatment including not having the procedure. Every person is unique and although good results are expected, it is impossible to guarantee results. My questions have been answered satisfactorily by the doctor, nurse, or laser technician. I accept the risks and complications of the procedure.

BY SIGNING BELOW, I ACKNOWLEDGE AND CERTIFY THAT I, _____,
HAVE READ AND UNDERSTAND THE "CONSENT, RELEASE AND INDEMNITY
AGREEMENT" FOR THIS PROCEDURE, AND THAT I AM SIGNING IT VOLUNTARILY.

PLEASE SIGN YOUR FULL NAME BELOW IF YOU AGREE.
