WILDFLOWERS

Wildflowers are living jewel
bursting with life emerge from
the thick carpet of dead leaves or
through the cracks on concrete ,
grows suddenly from nowhere.

lonely fluttering and dancing
with the breeze,
sprightly stretching
tossing towards sunshine .

I gazed heartily at this
little star that smiling.

At night in my bed when I lie ,
feeling a void within me
with my melancholic mood .

Suddenly I see the flash of
lonely flower inwards my eyes

A cheer magical bliss in solitude

The Terminology of Medicine

AUTOSOME: Is any chromosome other than a sex chromosome (chromosome 1-22)

GONOSOME: The pair of chromosomes responsible for sex determination (chromosomes X and Y)

HEMIZYGOUS: is often used to describe genes in males (because they have only one X chromosome)
