Iv used gen pharma test e, i would agree it may be underdosed. Iv also used their mast, ed, tbol, winstrol

tabs, clomid, nolva, all worked well. I would be interested to see bloodwork on the testosterone. I will say i thought equipoise might be underdosed also. ???????? ?????? ?????? ?????? ?????????? ?????????? ?????? ?????? ?????????? ?????? ?????? ?????????? ??? ?????? ?????????
????? ?????? ?????????? ?????????? ?????????????? ??????????????. I did hear their Test 300 can be a bit pippy and also potentially underdosed but if you pin 600mg (see your other thread) then likely hood the worse case your going to be getting around 500mg. Not the best way of doing it but unless you test every vial we all do the same.
