Sustanon 250 is a commonly prescribed drug for treating low testosterone levels in men (TRT). This steroid compound is used by athletes and bodybuilders to gain muscle mass and increase strength. This is in regards to my first cycle that I started a few weeks ago: So, I've been running Sustanon250 for 3 weeks now and the 10ml vial will probably finish in 1-2 more weeks, I already have a 10 ml bottle of test ethanate and I would like to run that for the remainder of the cycle. Since this is my first cycle, instead of injecting EOD, I am injecting Monday and Thursday at 250mg for a total ... I know it's been a while since you heard much from me. Not much new is going on to be honest. Currently soon 7 months

on hormones, which is going very well. Got my ass back to the gym after 1 year of absence. Still layed off from work due to corona and getting sick of being home all the time, but still studying! Been sick for a couple of months due to acid reflux from my stomach, however trying to get well from that and speaking to my doctor regularly. Have a voice-call appointment with the gender clinic next week, so we'll see how that goes!

Thank God It's Satu

Testosterone has been engrained in the general population's minds as steroids. So if you are thinking about starting TRT your partner may immediately think you are planning on using dangerous steroids. Many partners will think you are trying to cheat to gain muscles, will chest on them, will become angry and full of rage. This is simply not true. [visit site](#)

**Steroid Homebrew Recipes for Commonly Used Steroid and Displacement: Homebrew:** Steroid homebrew is the process of brewing steroidal compounds on a small scale for personal, non-commercial purposes. It gives the user total governance over the substance being taken, both positively and negatively.
