# Steps for unboxing a bathtub
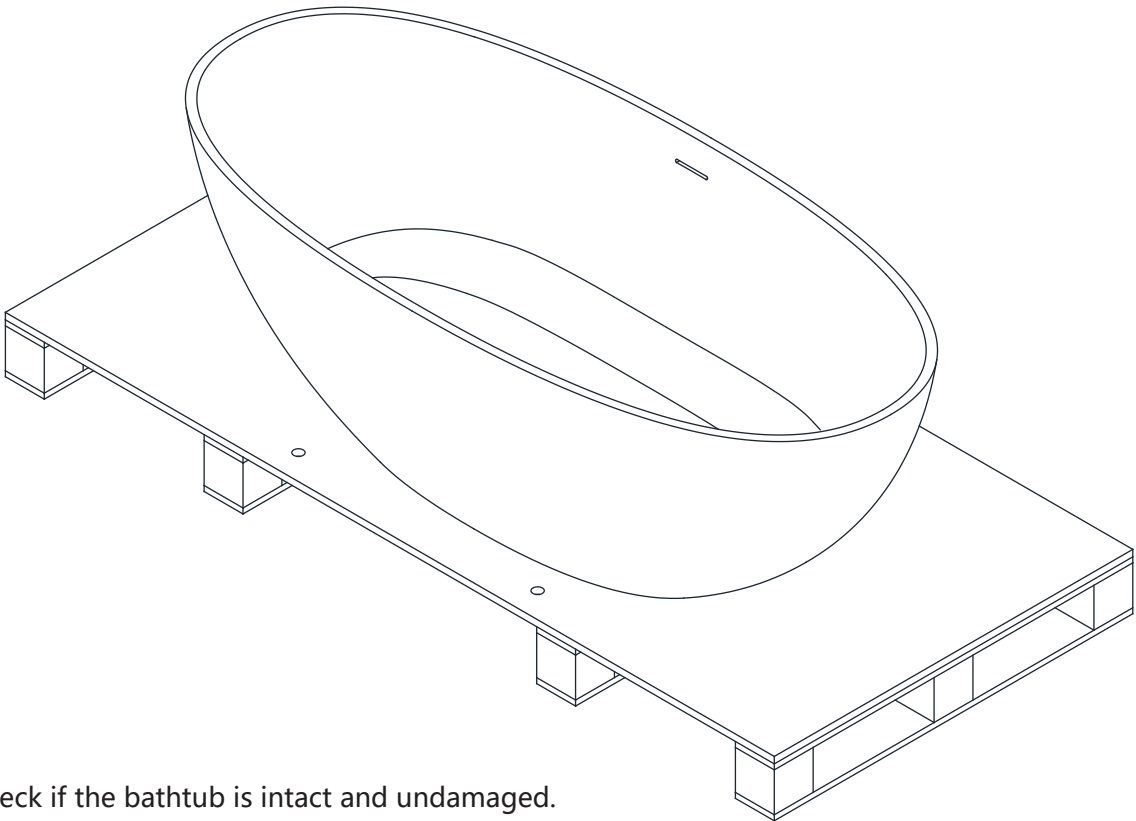

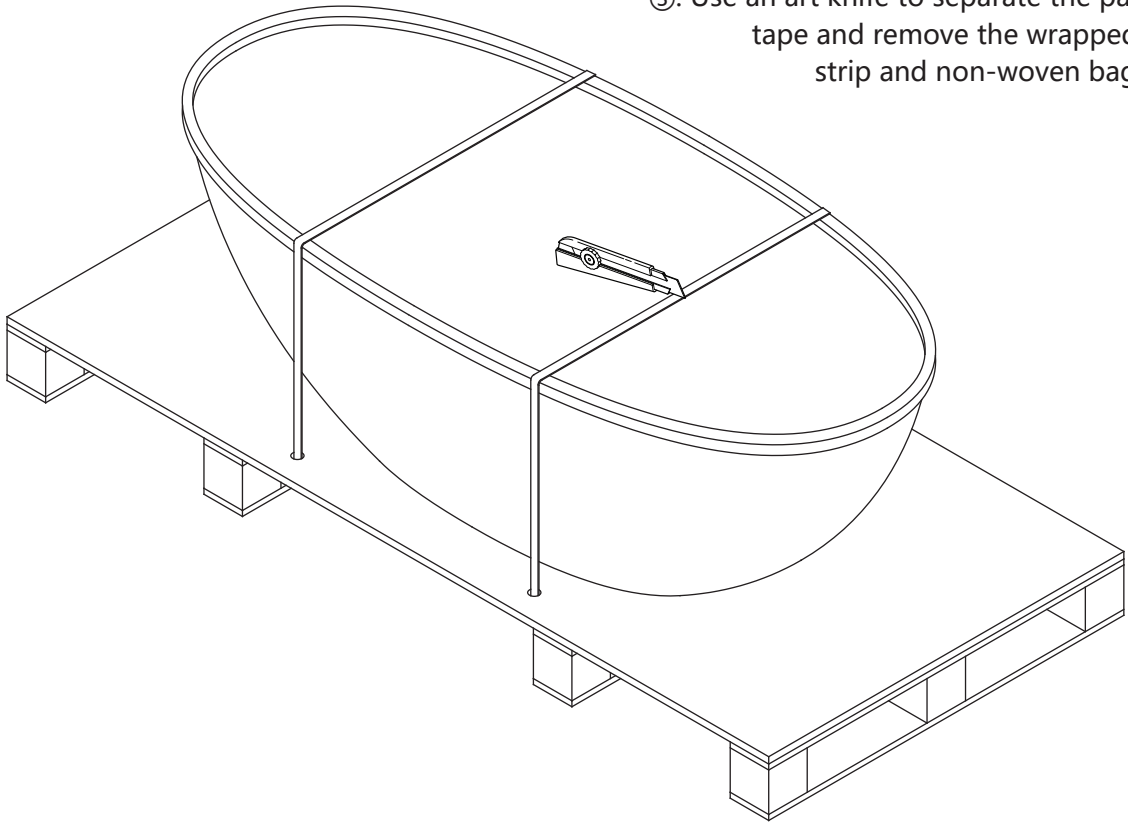

Installation tools:

Screwdriver ✛

The knife

①. Use a cross screwdriver to counterclockwise unscrew the screws around the bottom of the plywood box (screws on the top cover and other positions do not need to be unscrewed).

②. Two people need to lift and remove the box vertically together.

③. Use an art knife to separate the packaging tape and remove the wrapped cotton strip and non-woven bag.

④. Check if the bathtub is intact and undamaged.
