Test prop helps to speed up the metabolism so that you can burn off more calories, even in a rested state. The more calories you burn, the more fat you lose. Testosterone is responsible for promoting health and well-being through enhanced libido, energy, immunity, increased fat loss, gaining and maintaining lean muscle mass, preventing Osteoporosis (loss of bone density) and possible protection against heart disease. #testosterone #testosteronereplacementtherapy #testosteronetherapy #testosteronebooster #hormonereplacementtherapy #hormonereplacement #hormonetherapy #hormonehealth #hormonebalance #hormone #hormones #hormonalimbalance #menshealthmag #menshealthmag #menshealthawareness #lowtestosterone #lowt #menlifestyle #menhealth #cincy #cincinnati #cincinnati #ohioblogger

Testosterone Replacement Therapy: For Whom, When and How?

Few studies have shown, although the evidence is not so robust, that symptom-specific threshold levels may exist.

Loss of libido and vigor start to appear when T falls below 432 ng/dL and certainly below 349 ng/dL, when obesity also emerges.

Test Prop Benefits The general benefits of testosterone propionate are typically the same as cycling any other testosterone ester. Thus, users can experience roughly 20lbs of lean muscle (combined with some fat loss), when taking testosterone for the first time. Without an anabolic protectant like Testosterone Propionate, some lean muscle tissue loss will occur, this is a given. Due to the metabolic enhancement provided by high testosterone levels, the individual will also burn fat at a more efficient rate.
