

# MATERIAL SAFETY DATA SHEET

Prepared according to Regulation (EC) 1907/2006 – REACH and 1272/2008 - CLP.

Version 1, Revision date: 14/06/2022

---

## SECTION 1: PRODUCT IDENTIFICATION

---

Product name: beadMATRIX

Product IDs: M0101

Microspheres (microcarriers) composed of cross-linked polystyrene (PS) and coated with a mixture of extracellular matrix mimetic materials for cell culture applications. Intended use is to support the culture of adherent cells like mesenchymal stromal cells in shaker flasks, shaker bags, or any kind of bioreactors.

---

## SECTION 2: HAZARDS IDENTIFICATION

---

This product mixture does not meet the criteria for classification as hazards in accordance with Regulation (EC) No 1272/2008. It is provided in accordance with good safety practice.

---

## SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

---

Ingredients: The microcarriers, made of PS, are coated with a biological relevant polymer material, an optimized mixture of a polysaccharide and a peptide-poly(ethylene glycol) (PEG) conjugate. The composition is listed below:

1. Microcarriers are made of cross-linked PS. All products are sterile manufactured.
2. The polysaccharide is:  
Dextran sulfate                      CAS No.: 9011-18-1
3. The peptide-PEG conjugate contains a peptide sequence conjugated to PEG:  
PEG    CAS No.: 25322-68-3

Chemical Structure:

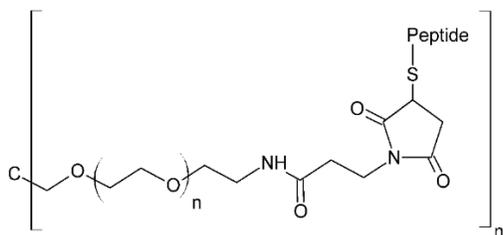

Figure 1. Chemical structure of peptide-PEG conjugate.

---

The average molecular weight of the peptide-PEG conjugates is ~ 25,000 Da.

---

#### **SECTION 4: FIRST AID MEASURES**

---

Inhalation: Not anticipated under recommended usage conditions. After inhalation of decomposed products, remove the affected person to a source of fresh air and keep calm. Provide medical aid.

Ingestion: Not anticipated under recommended usage conditions.

Skin contact: Not anticipated under recommended usage conditions. Areas affected by molten material should be quickly placed under cold running water

Eye contact: Not anticipated under recommended usage conditions. In case of contact with decomposed products, flush eyes with plenty of water. Get medical advice if irritation develops.

Note to physician: Treat according to symptoms (decontamination, vital functions), no known specific antidote.

---

#### **SECTION 5: FIRE FIGHTING MEASURES**

---

Extinguishing media: Water, dry extinguishing media, carbon dioxide, foam

Specific hazards: Principal toxicant in the smoke is carbon dioxide, carbon monoxide.

Special fire-fighting procedures: Use media appropriate for primary cause of fire.

Further information: Dispose of fire debris and contaminated extinguishing water in accordance with official regulations.

---

#### **SECTION 6: ACCIDENTAL RELEASE MEASURES**

---

Aspirate or sweep up any spills from liquids added to the microcarriers. All spilled material must be removed immediately to prevent slipping accidents. Dispose waste in accordance with local or national regulations. Remove all sources of ignition. Ventilate area of leak or spill. Wear appropriate personal protective equipment.

Solid Spills: Clean up spills in a manner that does not disperse dust into the air. Use non-sparking tools and equipment. Reduce airborne dust and prevent scattering by moistening with water. Pick up spill for recovery or disposal and place in a closed container.

Liquid Spills: Absorb with vermiculite, dry sand, earth or similar material and place in a chemical waste container. Do not use combustible materials, such as saw dust. Do not flush to sewer.

---

#### **SECTION 7: HANDLING AND STORAGE**

---

Protect against moisture. Protect against physical damage. Do not freeze either. Do not autoclave. To prevent fire related hazards, protect the product from heat and fire. Keep the product unopened, sealed away from light for long time storage.

---

---

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

---

No exposure limit established. As part of good industrial and personal hygiene and safety procedure, avoid all unnecessary exposure to the chemical substances. Wear appropriate personal protective equipment, gloves, and safety glasses for eye protection.

---

## SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

---

Form: Microcarriers, fine granular powder, dry and pourable  
Color: white to off-white color  
Odor: Faint  
Softening temperature: > 60 °C (DIN/EN/ISO 306:2013)  
Ignition temperature: > 400 °C

---

## SECTION 10: STABILITY AND REACTIVITY

---

Stability: Stable under ordinary conditions of use and storage. Thermal decomposition may occur above 60 °C. To avoid thermal decomposition, do not heat.

Hazardous decomposition products: Carbon dioxide and carbon monoxide may form when heated due to decomposition.

Hazardous polymerization: The product is prepared using a stable thermoplastic, with no chemical reactivity.

Incompatibilities: Incompatible with polymerization catalysts (peroxides, persulfates) and accelerators, strong oxidizers, strong bases and strong acids.

Conditions to avoid: Incompatibles and heat.

---

## SECTION 11: TOXICOLOGICAL INFORMATION

---

General information: The mixtures have not been tested for their effect on health. The mixtures contain polyanionic substances, which possess many biological activities in vivo. However, since the mixtures are provided at concentrations of less than 0.1% of the total product weight and individual substrates are poorly absorbed by the skin, no toxic effects are expected under normal operating conditions provided the recommended precautions. Reported toxicity of individual substrates used for the mixture are described in the following:

PEG: The oral rat LD50 is 31.6 g/kg.  
Dextran sulfate: The oral rat LD50 is 20.6 g/kg

Potential effects are acute toxicity, behavior – somnolence, ataxia and diarrhea.

No component of this product present at levels higher than or equal to 0.1% is identified as probable, possible, or confirmed human carcinogen by IARC, if used as intended.

---

## SECTION 12: ECOLOGICAL INFORMATION

---

Environmental fate: No information  
Environmental toxicity: No information

---

## SECTION 13: DISPOSAL CONSIDERATIONS

---

Do not dispose the product or any contents into the environment. Dispose of container and unused contents in accordance with federal, state and local requirements. Processing, use or contamination of this product may change the waste management options.

---

## SECTION 14: TRANSPORT INFORMATION

---

No restrictions for transport (ADR/RID, IMDG or ICAO/ATA)

---

## SECTION 15: REGULATORY INFORMATION

---

For this product a chemical safety assessment was not carried out. Contains no REACH Annex XIV substrates nor substrates with REACH Annex XVII restrictions.

---

## SECTION 16: OTHER INFORMATION

---

The product is intended for research purposes only as a laboratory consumable for cell culture. The information contained herein is based on the present state of our knowledge and does not therefore guarantee certain properties. The information contained herein is provided in good faith and is as accurate as possible but makes no representation as to its comprehensiveness or accuracy. However, neither denovoMATRIX GmbH, nor any other supplier of the products assumes any liability whatsoever for the accuracy or completeness of the information contained herein. The provided information relates only to the designated product and is not valid for any other product resulting as a modification or combination or any material or processes, not specified in this text.

This document is intended only as a guide to the appropriate precautionary handling of the material by a properly trained person using this product. Recipients of our product must take responsibility for observing existing laws and regulations. Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that this is the entire list of possible endangering that might arise. Individuals receiving the information must exercise their independent judgement in determining its appropriateness for a particular purpose.

denovoMATRIX GmbH makes no representations or warranties, either express or implied, including without limitation any warranties of merchantability, fitness for a particular purpose with respect to the information set forth herein or the product to which the information refers. Accordingly, denovoMATRIX GmbH will not be responsible for damages resulting from use of or reliance upon this information. denovoMATRIX GmbH reserves the right to change the raw material without any further notice. The Material Safety Data Sheet will be provided upon request.
